FRIENDS ANXIOUS TO AVENGE DEAD

Posses Are Forming in Many Places
to Take Part in Man Hunt.

Oklahoma City, June 7.—With posses forming in many places, bending every effort toward the capture of Alfred Hunter, alias James Kingbury, who killed Sheriff Garrison, intense excitement prevails in the entire western section of the state.

Taloga, Arapahoe, Chickasha sheriffs and peace officers from other districts have joined in the search, while the posses of civilians are large.

Buck Garrett, chief of police of Ardmore and close friend of the dead man, passed through Oklahoma City yesterday, hurrying to the scene. Garrett shipped his own mount and vowed that he would take to the field

when train service fails should he be unable to reach the immediate vicinity.

Bill Tilghman, sheriff of Lincoln county, another close friend to Sheriff Garrison, and Bill Grace, sheriff of Pottawatomie county, are on the trail. Grace reached here yesterday noon. He had learned of the tragedy Friday night, shortly after it occurred, and tried in every way to get in the chase, but could not get the early start.

Major A. J. Edgington of the state rifle team, Forest Van Skike, one of the expert riflemen of the state, and Sam Bender, another man who has established a record as a shot, have volunteered their services in the hunt for the negro murder, Alf Hunter, and left the city yesterday to join the posses in their chase into Kingfisher.

WATER IN THE RESERVOIR GONE

Thirty Feet of the Dam Undermined and in Less than One Hour Reservoir Is Empty

Ada is out of water. That is so far as the city water is concerned, and every industry that is using the water will do doubt be shut down indefinitely or make other arrangements for water.

Yesterday afternoon about 3 o'clock a small leak was noticed on the east side of the dam, and kept getting larger, but did not reach any dangerous proportion until 1 o'clock today when suddenly it became larger washing out 30 feet of earth under the dam and leaving only the concrete swinging. A place washed out large enough to almost run a box car under. The dam was visited this morning by several members of the council and Engineer Whittaker of the cement plant who advised with the council and a line of action was decided on to stop the leak, but the burst came before any thing could possibly be done to stop it. The council was arranging to put in a willow mat and several sacks of sand on the water side as recommended by Mr. Whittaker, but could not get to it in time. It is hard to estimate the cost of this accident. A phone message from the cement plant tells us it will shut them down indefinitely. This will throw several

hundred men out of employment, right in the dull season of the year, besides the ice plant, and the electric light plant. Mr. Frick informs us he will put his well in shape as quick as possible and hopes to suffer no inconvenience. The light plant will run tonight as there is water enough in the stand pipe to tide them over and are making an effort to get water from the oil mill and be connected up by tomorrow. It is hoped they will not have to stop at all.

Engineer Oneal and Contractor Lunsden have been wired but nothing has been heard from them so far. There is about \$700 due Mr. Lunsden on his contract, and we believe he will come down and rebuild the washed out part of the dam at once and without cost to the city. However that does not remedy the serious situation and the water famine it is liable to cause in Ada. The council, however, will call a meeting at once and try and devise some means if possible to furnish water. The well has caved in and almost worse than nothing. In fact, it would be dangerous to attempt to fix it while the ground is so wet and the well still caving.

SHERIFF GARRISON'S SLAYER WOUNDED

NOW SURROUNDED IN KINGFISHER NEIGHBORHOOD—HIS CAPTURE SOON.

JAIL UNDER GUARD OF SOLDIERS

Governor Haskell Orders Out National Guard to Suppress Possible Riots Here—Sheriff's Body Arrives on Special.

Oklahoma City, Ok., June 7.—Fears of a race war when Sheriff Garrison's body arrives in Oklahoma City on a special train at 3:30 this morning, led Governor Haskell to call out Company M. O. N. G. Adjutant General Canton came from Guthrie at 2:00 o'clock this morning to take command.

Some negroes were carrying guns last evening and in one or two instances slight outward demonstrations, indicating possible trouble, were made.

Wounded in three places and believed to be in all but a dying condition, one bullet in his hip, another in his abdomen and a third in his shoulder, Alf Hunter, negro desperado, who shot and killed Sheriff Garrison in a fierce battle in the Gyp hills near Watonga Friday night, spent the night in hiding near Kingfisher.

Weak from the 24 hours of almost unceasing flight, during which one man has been killed another wounded and the negro himself driven into close quarters only to extricate himself when the posses believed their quest was at an end, he may not be alive when found unless his rendezvous is discovered within a few hours.

Governor Haskell has offered \$500 reward for his capture.

True Story of Fight.

Hunter was first discovered in a dugout three miles east of Watonga Friday afternoon by Sheriff Garrison and his deputies. He had been warned of the approach of the officers by a confederate, who was on the lookout and when the party drove into the wheat field where Hunter and a com-

panion had sought shelter behind a strawstack, both of the negroes opened fire upon the officers.

The first shot hit Sheriff Garrison in the neck, while a second bullet penetrated his abdomen, either wound being (according to the physicians) equally fatal.

Just as he fell he cried: "Warden, come here," and died in three minutes.

When Sanders fell, he cried to (Continued on Page Two.)

A Little Scrubbing...

won't hurt him, in fact he will enjoy it if you use our baby talcum soap, as it is especially adapted to tender skin. It removes the dirt and leaves the skin as soft as velvet.

PONTOTOC LEGISLATORS.

Representatives Huddleston and Ratliff, since their return from Guthrie, have been busily engaged in extending friendly greeting to hundreds of their constituency over the district and ascertaining from them their estimation of the services generally rendered by the first state legislature.

Frank Huddleston was one of the leading farmer representatives in the legislature and especially is he well versed regarding the substantial legislation considered and enacted which reflects advantageously in behalf of the farmer people, the people of whom he is one, to whom he is indebted for his office and for whom he has the greatest regard. Frank Huddleston, as a member of the farmers caucus in the legislature, probably initiated as many movements and promoted as many practical actions, in behalf of the laboring class, which found actual lodgment in the laws lately placed on the statute books of this state, as any other man in the legislature.

It is not definitely known whether Mr. Huddleston will be a candidate for re-election, but if he should become a candidate for re-election, aside from the generally accepted practice of retarding a legislator for a second term when he has performed reasonably satisfactory service the first term—aside from that—the fact that the actual records show the excellent character of his service, the substantial results obtained by him, it is the conscientious judgment of the News as a democratic paper, desirous of being a strong conservator of the interests of the people of Pontotoc county, that it should extend him public and unequivocal support.

Last spring, when Mr. Huddleston became a candidate for a state representative, the News editor did not believe him strong enough to properly represent the people of this county. I voted for the Hon. Randolph Lawrence, a banker, the candidate offered by Roff for the legislature. Mr. Huddleston's legislative record would surely dispel the thought, if it should occur to any citizen that he is not capable, and the News rejoices that opportunity affords to make such declaration.

CONDITIONS ALARMING.

Flood Reports Today Are of Most Serious Nature.

Ardmore, June 5.—The rain storm of last night has made bad matters worse so far as securing train service out of Ardmore in either direction of the Santa Fe. Advices received by the local agent this morning are anything but encouraging, and conditions are worse than when the first heavy rain fell in this section and took out the tracks and bridges to the north and washed out the approaches to Red river bridge on the south. The Washita river this morning was within four inches as high as the highest point about three weeks ago and the water was rising at the rate of about two inches

per hour. Reports received state that water was at least twelve feet high in little canyon near Dougherty, and that water was running over the railroad bridge at Pauls Valley. It is reported that water at Pauls Valley is six inches higher than during the previous flood, and that the entire town is inundated. All of the bridges north are washed out, and the tracks that have but recently been put in are gone.

The reports from Red river are to the effect that the river is rising steadily at the rate of two inches per hour, and that no work was done all day yesterday and last night, but a large force of hands have been kept employed at the bridge to keep the driftwood from destroying what work had been accomplished since the waters receded. Reports were received, though not verified, that all of the work that had been done at Denison, Texas, in the way of repairs to the bridge across the river at that point were washed out last night and conditions at that point are worse than before.

It is said that the heaviest rain storm of the year occurred between Pauls Valley and Chickasha through that section of the country and the entire country between those two points is under water.

All connections north of here above Berwyn has been cut off on the Santa Fe.

The agent of the Rock Island-Frisco up to a late hour this morning has received no report of much damage on that line, although yesterday a bridge on the main line of the Rock Island near Jefferson had washed out but was repaired and train service resumed. No reports were received this morning concerning damages.

Passenger trains came in last night and left this morning.

VOKE INITIATIVE FOR THE LESSEES

Conferees With Governor Draft Measure for Fall Issue.

Guthrie, Okla., June 4.—Under that unique provision of the constitution that reserved to the people of the new state the prerogative of initiating their own legislation doubtless will be determined the disposition of the only real burning issue left unsettled by the first legislature, the sale of the school lands. Today's proceedings of the school land conference, the first held under statehood, which was called by Governor Haskell, resulted in the partial formulation of a measure that is satisfactory to a majority of the 300 lessees present. Tomorrow it will be completed, after which petitions will be circulated, asking that the qualified electors consent to the measure becoming an issue to be voted upon at the November election. Five per cent of the electors are necessary to a complete petition under the constitution.

The lessees met in the supreme court chamber today and were addressed by Governor Haskell, William H. Murray, Secretary L. D. Marr of the school land commission, Senator J. Elmer Thomas of Lawton and others. A joint committee to draft a bill, representing the lessees and the state, was appointed, consisting of W. M. Mitchell and J. Bohart of Caddo county, J. L. Williams of Lincoln county, J. N. Johnson of Oklahoma county, J. B. Tosh of Kiowa county and John Golobie of Logan county, for the lessees, and Governor Haskell, W. H. Murray, Senator

Thomas, F. H. Greer and L. D. Marr for the state.

SHERIFF GARRISON'S SLAYER WOUNDED

(Continued from Page One.)

Warden:

"Get down, Todd; he has got us and will get you."

Sheriff Garrison was taking deliberate aim when the first bullet struck him, and both the negro's and the sheriff's guns were fired simultaneously. The officers continued their fire riddling the straw stack with their bullets until their supply was exhausted.

The negroes knowing the sheriff evidently centered their fire upon him, since he was the first to receive wounds quickly in succession. Deputy M. L. Sanders' wound is not dangerous and the bullet has been extracted from his hip.

After the sheriff dropped and his deputy was wounded, the negroes again sought cover behind the straw stack, where they remained under guard of the deputies while the remaining ones returned to Watonga for more ammunition. Having one dead, another wounded, and no ammunition, there was nothing for the officers to do but stand guard until reinforcements arrived. Despite their vigilance, however, under cover of darkness, the negro made his escape, and when they later set fire to the stack he was not to be found.

If one feels dull and spiritless, in the spring or early summer, they call it "Spring Fever." But there is no fever—usually. It is the after effect of our winter habits. The nerves are mostly at fault. Tired, worn-out nerves leave us languid, lifeless and without spirit or ambition. A few doses of Dr. Shoop's Restorative will absolutely and quickly change all of these depressing symptoms. The Restorative of course won't bring you back to full health in a day or two, but it will do enough in 48 hours to satisfy you that the remedy is reaching that "tired spot." Druggists everywhere are advising its use as a splendid and prompt general tonic. It gives more vim and more spirit to the spongy than any other known nerve or constitutional tonic. It sharpens a falling appetite, aids digestion, frees sluggish livers and kidneys, and brings new life, strength and ambition. Test it a few days and be convinced.

G. M. RAMSEY.

Indigestion

Stomach trouble is but a symptom of, and not in itself a true disease. We think of Dyspepsia, Heartburn, and Indigestion as real diseases, yet they are symptoms only of a certain specific nerve sickness—nothing else. It was this fact that first correctly led Dr. Shoop in the creation of that now very popular Stomach Remedy—Dr. Shoop's Restorative. Going direct to the stomach nerves, alone brought that success and favor to Dr. Shoop and his Restorative. Without that original and highly vital principle, no such lasting accomplishments were ever to be had. For stomach distress, bloating, biliousness, bad breath and sallow complexion, try Dr. Shoop's Restorative—Tablets or Liquid—and see for yourself what it can and will do. We sell and cheerfully recommend.

CARELESS BOYS.

Loafers Around the Depots Should Be Locked Up—Several Almost Serious Accidents.

It seems a lot of boys in Ada are inclined to loaf around the depots at train time each day. For the last few days they have been very much in evidence, climbing over cars and playing ball etc., wherever it is convenient. The reporter of the News has noted three times how near boys have come to being killed but has refrained heretofore from mentioning it, but Saturday morning after seeing a boy come so near being run over he can not refrain from calling attention to it. Three or four boys were playing on the tracks in front of the depot, when the switch engine with a train of cars was backing down the main line, a boy carelessly playing on the tracks would have been run over had not bystanders began yelling at him. He paid no attention whatever to the whistling of the engine. Another boy a few days ago was fooling with the air hose at the rear of a train standing on the siding when the engine bumped the other end of the train, a negro happened to be standing near and jerked the boy away or he would have been killed, also another boy climbing through the cars in the yards the other day was knocked to the ground. Of course it is always the railroad company's fault when an accident happens, and the first thing to do is to sue the railway company, when your boy has got no earthly business around the depot. He should be at home or at school and when school is out find something for him to do. There is a city ordinance against boys playing around railway depots or on their tracks, and it should be enforced, and the News expects here after when boys are found loitering around depots and jumping on trains to publish their names, and some of you dadys will perhaps be surprised when you find out your boy is doing such things.

Bif! Bang! Boom!
The Big Sale in morning and afternoon. GRAND LEADER, Ada, Okla.

GIVEN AWAY.
A \$25.00 Suit, also some free pressing. For particulars call at Nash's Tailor Shop. d59

The Normal Will Run Six Weeks.

On last Saturday it was learned that the governor had vetoed the bill appropriating \$1500 to each county on the east side of Oklahoma. County Supt. Pierce got the conductor and instructors together at once, and organized for the regular county institute of four weeks which the law requires.

The instructors in their liberality agreed to give the county two weeks service free, equal to \$50 each, and continue the normal six weeks instead of four weeks. So Pontotoc county will have six weeks instead of four weeks.

There will be a fee of \$3.00 charged as per law for every one who attends. This is necessary to defray the expense of running the normal in addition to what the county commissioners allow.

All teachers who are holding Oklahoma or Federal certificates that are still in force, by attending the normal will have them extended for a length of time equal to the time for which the certificate was originally issued.

It is hoped that every teacher in the county will take advantage of this normal, and enlist at once. The work is of a high order.

Shocked by Lightning.

T. E. Cullins, living north of Capital Hill addition was standing in the door of his home yesterday morning when lightning struck some where near and he was knocked to the floor. He was not injured in any way except a little frightened.

Cold Storage Candy.

Mr. T. O. Cullins is up to date on the candy proposition. He has put in a candy refrigerator that keeps his candies cool and nice through the hot season. It has three apartments, one for ice and two for candy. This insures nice fresh candy at all times.

Store closed tomorrow for marking goods down. 20 sales-people wanted. Be on time Wednesday morning 8:30, June 10th.
Big Sale Begins.

GRAND LEADER, Ada.

The Grand Leader, Ada, Okla.
Interest to the ladies—Our experienced trimmer, Miss Hattie Adams will only be with you two more weeks. Right now you may need a stylish mid-summer hat. Notice the prices we advertise on our Big Bill for two weeks only. Begin Wednesday June 10th. Plenty clerks to wait on you.

We are now prepared to manufacture on short notice anything you may want that is practical to be constructed of concrete.

DANGER IN DELAY

Kidney Diseases Are Too Dangerous to Neglect

The great danger of kidney troubles is that they get a firm hold before the sufferer recognizes them. Health is gradually undermined. Backache, headache, nervousness, lameness, soreness, lumbago, urinary troubles, Bright's disease follow in merciless succession. Don't neglect your kidneys. Cure the kidneys with the certain and safe remedy, Doan's Kidney Pills.

B. F. Mills, of Ardmore, I. T., tailor and dyer, residing at 509 West Main street, says: "In the month of May, 1902, I gave for publication a testimonial recommending Doan's Kidney Pills. They cured me of a pain in my back, never severe enough to cause me to lay off work, but sufficient to cause me more pain than one should endure when Doan's Kidney Pills can be easily obtained. I cannot add anything to my original statement today except that I have exerted myself in many ways, but have never had the slightest symptom of a recurrence of my old trouble. Doan's Kidney Pills cure absolutely." For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

Boy of 14 Confesses Three Murders.

Norwood, Mass., June 6.—After startling the police today by declaring that he had killed two boys in Brooklyn last March, Anthony Santo, a 14-year-old boy, later in the day told the authorities that he was guilty of the killing of 6-year-old Louise Slauca at Dedham on May 11. The death of the girl has been a mystery. Her body was found in a field. The boy's mind has been affected by illness.

NO CHARGE FOR LAYING YOUR MATTING OR LENOLEUM IF BOUGHT AT OUR STORE

We relieve you of an unpleasant task, do our work well, and sell at the same price as the other fellow, taking into consideration quality always

SHADE HANGING

We could not pay drayage and hang an isolated shade or two, but will hang free of charge a bill of shades or any quantity in connection with the purchase of other goods.

Refrigerators, Quick-meal Gasoline Stoves, Ball-bearing Lawn Mowers and White Mountain Freezers, to Suit Everyone

Has it occurred to you that some refrigerators are dear at any price? The reason is this: Poor insulation causes a constant waste of ice; and poor circulation does not insure keeping the provisions pure. Ten years selling Greenland Refrigerators has demonstrated their superior qualities over many others. Buy a good one

I surely would not send it free unless I was certain that Dr. Shoop's Magic Ointment would stand the test. Remember it is made expressly and alone for swollen, painful, bleeding or itching piles, either external or internal. Large jar 50 c. Sold by

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure it with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from ten drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address: F. J. CHENEY & CO., Toledo, Ohio.
Sold by Druggists, 75c.

DeWitt's Kidney and Bladder Pills are prompt and thorough and will in a very short time strengthen the weakened kidneys. Sold by Crescent Drug Store, F. Z. Holly, Proprietor. Kodol is the best known preparation that is offered to the people today for dyspepsia or indigestion or any stomach trouble. Kodol digests all foods. It is pleasant to take. It is sold here by Crescent Drug Store, F. Z. Holly, proprietor.

Operation for piles will not be necessary if you use Man Zan Pile Remedy. Put up ready to use. Price 50 c. Try it.

Sold by Gwin, Mays & Co.
Bees Laxative Cough Syrup recommended by mothers for young and old is prompt relief for coughs, colds, croup, hoarseness, whooping cough. Gently laxative and pleasant to take. Guaranteed. Should be kept in every household.
Sold by Gwin, Mays & Co.

Brother Massey Gone.

Rev. E. L. Massey beloved pastor of the North Ada M. E. church, south departed from Ada this afternoon for the home of his boyhood, Moorefield Ark. His family accompanied him.

The Rev. Massey is afflicted with the dread and unrelenting disease of pernicious anemia. Over at Moorefield, the residence of his youth where nestles the old homestead and near by the placid waters of the old swimming hole enclotted in banks of verdant green in which there is buried the roots of the massive oaks, Brother Massey is gone and there he will view the old familiar land marks, sit within the shade of the clinging vines in the old rocking chair at the end of the porch and for a little while between his long and quiet rests he may wander down and lounge under the shades near the old swimming place while the reminiscences of the happy boyhood days may lend enchantment and for a little while and to some extent surcease the pain that must envelope his poor wasted frame and the sorrow that must distract his christian heart, that he must soon answer the summons which shall call him from the support and association of a loving family and from the ripening field, the sheaves of which were always respondent to his Godly seythe.

The prayers of the christian people of Ada will follow Brother Massey to his old home, and should perchance a great providence interpose and he be spared to continue his pastoral benefactions at Ada, all the community will rejoice.

For Sale or Trade.

OPEN AIR WAR ON PNEUMONIA

OPEN AIR ROOF WARD - AWNINGS DOWN

That fresh air is the best kind of medicine for almost every kind of disease which in any way affects the respiratory organs is coming more and more to be realized. Years ago persons suffering from bronchitis, pneumonia and kindred ailments were guarded with the most zealous care lest the least whiff of fresh, cool air should strike them or even enter the room where the patient was confined. And to the common mind even to-day pneumonia is associated with warm rooms protected from every draught, with efforts to keep the temperature equable. But such methods no longer receive the indorsement of the professional men whose business it is to keep pace with the latest developments of medical and surgical science. It is no longer the close room where the pneumonia patient is kept sheltered but in the apartment where the greatest amount of fresh air can be secured. Perhaps the Presbyterian hospital of New York has taken the most advanced steps in respect to this open air treatment for pneumonia, and a visit to their roof ward would come as a shock and a revelation to many who still hold to the old method of treatment.

There on that high, exposed place, with only canvas awnings to shelter from snow or rain are to be seen a score or more of patients on iron beds, their pallid faces upturned to the winter sky, their breath frosted by the keen wind, and the falling light of the bleak winter day giving an aspect of utter dreariness to the wind-swept space.

"These," said the doctor in attendance, with a comprehensive sweep of arm over the still, white faces, "are our pneumonia patients. We have now about 45 in all. Here is where we bring them to combat the disease. See this one—high fever, delirious when brought in, now resting comparatively easy—asleep, as you may see. This other, a child four years old—here, put your arms under the cover—there, now, keep still and go to sleep. Afraid of the dark? It won't hurt you. Go to sleep now. You'll wake up feeling all right."

Yet here were pneumonia patients, many of tender years, exposed to every winter blast that blew; no roof overhead, only an awning that could be slid over rods in case of rain or sleet or snow. It seemed barbaric. The doctor said that it was only revolutionary.

Here is Dr. William P. Northrup of the visiting staff of the Presbyterian hospital, and it was due to his strong faith in this radical idea, and to his insistence in the virtues of the open-air treatment for all suffering from pneumonia and acute infectious diseases, such as typhoid, scarlet fever, diphtheria, etc., that this open-air ward was established on the roof of the hospital.

"In one sense it is an experiment," Dr. Northrup said, "and in another it is not. I have employed the treatment in private practice and have been more than satisfied with the result. It is an experiment only in the sense that this is the first time it is being tried out in a hospital and on a large scale. It was only at the beginning of this winter that the ward was made ready for the reception of pneumonia patients. That is the only type of disease that we are treating in it now."

"The result has been satisfactory. It has been conclusively shown that no harm has followed the sending of the patients directly into the open air, and conspicuous benefits have been noted. The patients are less nervous, their sleep is better, and this conserves their strength; they are able to take more nourishment, and once past the crisis their recovery is more rapid."

"It is not claimed that the open-air treatment kills bacteria. It is not even sure that it shortens the period of the disease. But it is sure that it enables the patient to bear up against the poison, helps him throw it off, renders breathing less difficult, induces restful sleep, increases appetite, aids the assimilation of food—in short, contributes in every way to his betterment and harms him in no way at all."

The establishment of the open-air ward was the result of Dr. Northrup's

recommendations and the munificence of Mrs. W. K. Vanderbilt, who bore the expenses of the undertaking, and who has shown much interest in the experiment, being a frequent visitor to the institution.

What led to the adoption of the open-air ward was the successful outcome of an experiment which directly preceded the permanent installation of the ward.

"A portion of the roof," Dr. Northrup explained, "was extemporized into a roof garden for the benefit of the sick children who were sent to the hospital for treatment. A framework of iron piping, covered with canvas was made to lean to, around the sides of which canvas curtains were adjusted. The arrangement was crude, but did good work in summer and early fall. What was pronounced a very cozy place for a family picnic party in September or October was by the same persons denominated desolate in November and December. However, it was airy, well sunned, and endurable. The children spent six hours a day there all winter, the entire ward being emptied out upon the roof, while their ward below on the first floor was well 'blown out' through the wide-open windows."

"What kind of cases were sent to the roof? All cases. On many days every case in the children's ward was sent to the roof. Exceptionally, where the case was considered unfit for removal, such as one having a weak heart, or one just recovering from an operation, or when an extension apparatus was attached to the bed, a child or two remained in the ward. This was regrettable, because the ward could not then be adequately aired through wide-open windows. By all cases I mean pneumonia in all stages, appendicitis, meningitis, burns, fractures, etc."

"Most onlookers have wished to know details about pneumonia cases taken out of doors on the roof. All pneumonia cases in the height of fever, while the stimulating effect of the pneumotoxin was full on, were regularly on the list to go to the roof for six hours on pleasant days. That did not mean avoiding winds or cold with sunlight, but avoiding rain or snow."

"It has been noted by the nurses that the children on rainy days, after being confined to the ward all day, become restless and peevish toward evening. When returned from a good airing on the roof they are hungry and sleepy. At night their sleep is quiet, profound, unbroken."

"This 'roof ward' only illustrates the greater emphasis now being laid by the medical profession on fresh-air treatment."

POISONING FROM MOTOR GASES.

Prove in Some Cases Very Harmful to Motor Occupants.

A curious and interesting fact regarding what may be called "automobile poisoning" has been recently communicated to the Paris Society of Legal Medicine by Mr. Marcel Briand, as reported to La Nature. Says this paper:

"The waste gases are capable, if the journey is a long one, of producing real symptoms of poisoning. Some automobilists have actually been obliged to give up their favorite sport because of the gases which, penetrating in small quantities even to the interior of the vehicle, cause them persistent trouble. The waste gases not being adapted for contact with our bronchial tubes, it is proper to notify the automobile makers that the floors of their machines should be made at tight as possible, in order that passengers may be protected from these products, which may, at the very least, cause distressing headaches."

Where They Went.

A business concern in Park row which runs about all night had missed scores of incandescent globes lately. Since these globes are fairly expensive and the item of loss had become pretty sizable, a detective was put on the job. It took him just 24 hours to find that the globes were as good as cash over the bars of the Park row and Bowery gin-mills—one globe, one drink of whisky.—New York Sun.

FAVORS INTERNAL WATER WAYS

SENATOR NEWLANDS

United States Senator Francis Griffith Newlands, who spoke at the annual dinner of the Traffic club of Chicago on "The Co-ordination of Rail and Water Transportation," is an enthusiastic advocate of internal water ways. He was born in Natchez, Miss., Aug. 28, 1848, studied for two and a half years at Yale college and at the Columbian College Law School, Washington, was admitted to the bar in the District of Columbia and practiced law in San Francisco until 1888, when he became a citizen of Nevada. From 1893 to 1903 he was a representative in congress. He became senator in 1903.

LION AFRAID OF BOARHOUND. IN COSMOPOLITAN NEW YORK.

Tamers Use Big Dogs to Keep Unruly Charges in Subjection.

The boarhound growled, and the great yellow lion leaped back in fear. "The lion could kill the hound," the trainer said, "but he doesn't think so. He thinks the hound could easily kill him."

"Why?" "When the lion was a cub, this boarhound, full-grown, lived in the cage with him. The big dog could, of course, lick the little cub, and the cub therefore feared and respected him. Now the cub is grown up, but he still thinks the hound is the better man."

"We rear a cub with a full-grown hound in this way for a reason. The hound is a protection to us trainers afterward, when the cub is grown; for then, should he become rabid, one look from the dog will send him, subdued and ashamed, slinking off to the cage's farthest corner."

INTERESTED IN WEATHER LORE.

University Students Taking Up the Science of Meteorology.

A steady increase of interest in meteorological education is manifest throughout the country, as, in fact, throughout other civilized nations. In

A Restaurant Example of the Ever Striking Side of the City.

Of course New York is cosmopolitan and it isn't extraordinarily new to call attention to the fact. But the way that it is borne in upon each of us always makes an appeal as something quite novel, says the New York Sun.

For instance, the day's news with the various names of persons who have done something to get them mentioned is proof enough of cosmopolitanism. But here's another example:

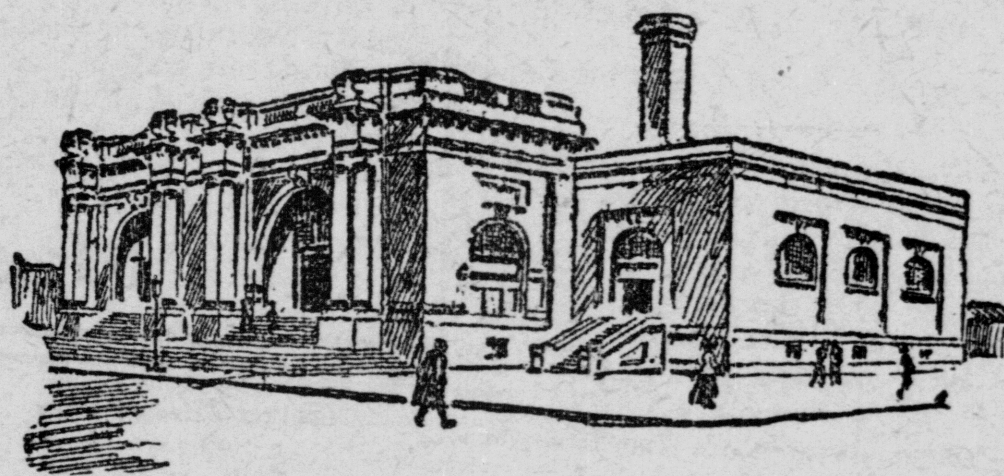

A downtown restaurant whose proprietor and waiting force are French was in full blast the other evening. At a table very near the door sat an Italian city official, chatting briskly with his Sicilian friends, three in number. Three feet away, at the next table, sat two men who spoke Spanish. Judged from the speech, one was of Andalusia the other of Castile.

At the table next them, separated again by three feet, was a man reading a German comic paper. He spoke in French to the waiter.

Oh, yes, there were English-speaking persons there.

Captain Puts on His Red Necktie. No matter how small the vessel nor how impecunious may be the skipper,

ROMAN BATH FOR NEW YORK

The New Free Bath in New York Which Rivals the Sumptuous Establishments of Old Rome.

The most pretentious thing in the way of free public baths yet attempted by any American city has been opened in New York in the form of a pool and compartment bathhouse to be open in all seasons which is said to rival the sumptuous baths of Imperial Rome.

general instruction in meteorology is considered as a part of the courses in geology, geography or physical geography; but in two universities, George Washington and Cornell, courses have been offered in the higher mathematics and physics that constitute the fundamental basis of meteorology.

During 1906 there were 14 universities, colleges and scientific schools in which regular courses of instruction were given by weather bureau officials, and in five or six more the matter was in abeyance. Also there were at least 40 officials besides these conducting the above-mentioned courses who gave occasional lectures or addresses.

Convert to New Creed.

At a dinner given in honor of Augustus Thomas, the playwright, Mr. Thomas discussed his recent efforts at writing plays about telepathy, the occult, etc., and said:

"I am compelled to admit that the occult is becoming popular. Only the other day a chorus girl was entering the lobby of a theater when she met the manager."

"Well, I declare, Mr. Brown," she exclaimed, "if this isn't odd. Here I was just thinking of you this minute, and now you turn up. I always did believe in osteopathy."

Innocence.

Small Brother—I don't see, that you're growin' very fat, sis. What you scared of?

Big Sister—Why, I'm not! What put that into your head?

Small Brother—Well, when that feller was in th' parlor with you last night, I heard you say: "Ain't I gettin' heavy?"

there is always a "boiled" shirt and a clean collar laid carefully away to be worn when the craft enters port. At sea the captain may be very rough in his attire, but the approach of land finds him combing his hair and cropping his whiskers, if he has any, and the collar is donned, also a red necktie, which usually is flamboyant red.

Even the poorest men who bring vessels to Boston to secure loads of lumber for South American ports dress as neatly as possible when the customs boarding officer is expected to come alongside to inspect the ship's papers.

And the mates slick up too when their floating home is nearing port, so that the "old man," as the captain is familiarly termed behind his back, may not carry off all the honors of the occasion.

Looks Back on Years Well Spent.

Mrs. Mary E. Parker of Honolulu, a Congregational foreign missionary when Hawaii was foreign territory, celebrated some time ago the centennial of her birth. She has been 72 years on mission ground, a continuous missionary career without parallel. Mrs. Parker and her husband, Rev. Benjamin W. Parker, went to the Sandwich islands as missionaries in 1832.

Like Babies.

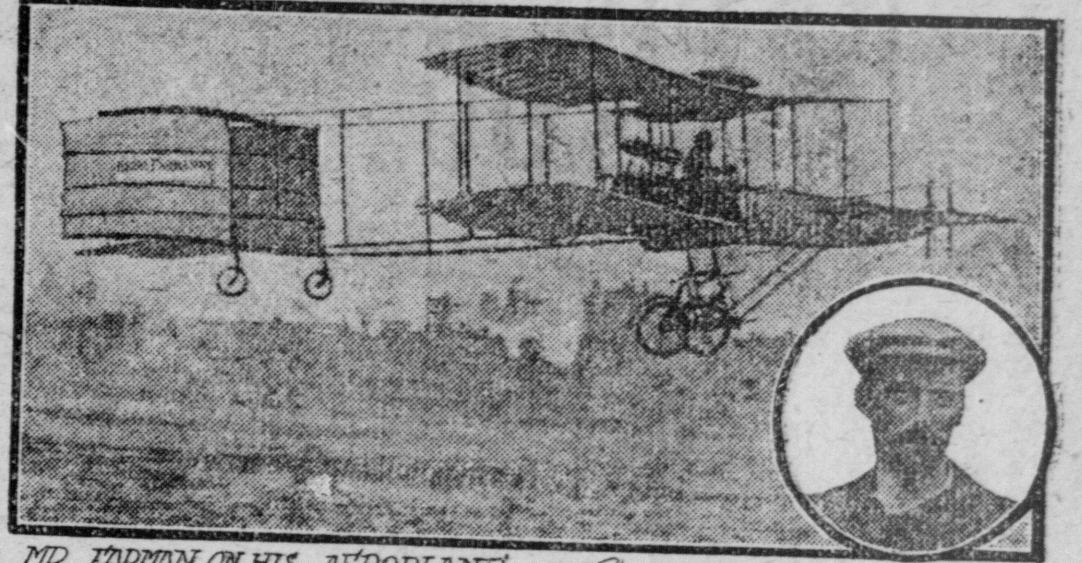

She—There is something awful funny in these accounts of prize fights.

He—What is it?

She—They talk of one fighter putting another fighter to sleep. How do they do it? Do they drug them?

He (sarcastically)—Oh, no! They just cuddle 'em and sing 'em lullabies till they drop off and smile in slumber at the angels' whispers.

Is AIRSHIP PROBLEM SOLVED?

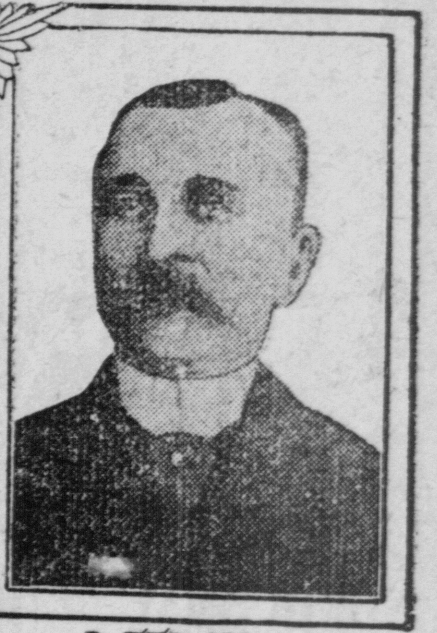

MR. FARMAN ON HIS AEROPLANE

M. HENRY FARMAN.

FERON'S AIR SHIP

A FERON

This question has been asked time and again in the past but it must be asked again with increased emphasis in view of the recent remarkable feat of M. Henry Farman, the French aeronaut, who made a perfect circle in his aeroplane at Paris, thereby winning the Deutsch-Archdeacon prize of \$10,000. The circle which Farman described had a radius of one kilometer, almost five-eighths of a mile, and during the entire flight the aeroplane appeared to be under perfect control, displaying rare equilibrium and making the continuous turn on an even keel. The Deutsch-Archdeacon prize had been offered to the aviator, or aeronaut, who first succeeded in completing a circular kilometer in the air.

As a second accomplishment M. Farman demonstrated beyond doubt that his aeroplane has solved for all time the problem of aeronautics, that the heavier-than-air power kite, and not the gas-bag flying machine, is the airship of the future. The flight of the Farman aeroplane marks a record in aerial navigation.

The third thing M. Farman did was to predict the speedy inauguration of an aeroplane omnibus service between Paris and London, a distance of 287 miles, with the possibility of the service being extended to all parts of Europe and even to New York. It is simply a question now of determining how large the aeroplane must be to fly thousands instead of merely hundreds of miles.

Wildly imaginative as it may seem at the present time, the idea of constructing aeroplanes capable of flying from New York to London or Paris is receiving encouragement from deep thinking scientists and inventors interested in aeronautics whose opinions have weight and who are generally credited with knowing what they are talking about.

The Farman aeroplane, which has opened a new field for speculation as to the future of aeronautics, resembles a huge dragon fly with upper and lower sets of wings. On the under side are four bicycle wheels upon which the machine glides along the ground until it has gathered sufficient impetus to rise from the ground and commence its flight. The motor and operator are situated between the two front lateral wings, and the course of the machine is governed by a small aeroplane placed in front. The machine is propelled by two revolving blades in the rear. These act on the same principle as the screws of a steamship.

It is interesting to note that the late Prof. Langley is in reality responsible for the success of the Farman aeroplane. M. Farman went ahead just where Prof. Langley left off and has embodied in his flying machine all the correct principles and theories governing the Langley aeroplane.

Very little can be told at present as to the size or capacity of the aeroplanes for the projected London to Paris service. Each aeroplane will necessarily have to be many times larger than the machine with which M. Farman won the Deutsch-Archdeacon prize.

As stated above, the present type of aeroplane starts by gliding along the ground until sufficient impetus has been gathered to give it a lifting power. Then it gradually rises to be guided along in any direction desired by the operator and propelled by the motor-driven propeller blades behind. This method of getting a start, it has been suggested, may be improved upon by following out the idea of Prof. Langley. His plan was to provide a launching platform several feet above ground to be reached by an inclined plane. The Langley idea was to haul or propel the aeroplane up the inclined plane at a good speed and then to project it from the platform out into open space, where the aeroplane was to take care of itself by skimming

along through the air, instead of falling. And while Farman and Dumont and other aeronauts of Europe are busy working on the problem of air navigation, American inventors are not idle. Mr. Arthur Feron, a New York architect, is the latest experimenter in aeronautics to command attention. He claims to have solved the problem of aerial flight by means of a machine that is heavier than air yet not a dead weight in the atmosphere. He has invented an airship circular in the main points of its structure, which, like a huge pinwheel spins its way from earth to the higher levels.

Feron is the first man to give practical expression to an idea which has long possessed students of the aerial navigation problem—the idea that aluminum might be substituted for silk or other textile as a strong tank for the gas.

Although oxygen gas is used by Mr. Feron as an agent of buoyancy, his device is not a dirigible balloon. It is a flying machine in as full a sense of the word as the aeroplanes of the Wright brothers or of Farman, but it is made of finest aluminum.

The significance of this departure, attended as it has been by success, is more apparent to experts in aeronautics than to the lay mind. But the Feron filter has one quality which all can appreciate—it flies. This has been proven by experiments made with models constructed on varying scales.

Mr. Feron does not depend entirely upon the gas to keep his machine in the air. It is intended only to lighten the task of the rising screw, which is the soul of this flyer. The airship is composed of two distinct parts, which may be described as the upper and the lower works. In the upper works is the cylindrical aluminum bag, resembling a huge crown. It has a diameter of 96 feet. It has 32 air tight compartments. From the cylinder hang the cords that hold a car which will accommodate three persons besides the operator.

The lower works consist of the basket or car, ten feet square and five feet deep; the rising screw, the propellers and steering gear and motor. There are two "decks" to the car. On the lower one, or the bottom, rests the motor and all machinery for working the rising and propelling screws. The upper deck, for the use of the passengers, is fitted on a small scale with facilities for comfort. The operator's place also is here, with the telescopes, compass, barometer and other instruments needed by aerial navigators close at hand.

The rising screw is set upon the end of an upright shaft which passes from the machine compartment through the main deck to a point 15 feet above the rim of the car. The rising screw has two blades shaped like the blades of a steamship propeller. Its motion, however, is horizontal. It pushes the air beneath it and makes the airship mount, where the water's propeller pushes the water behind it and makes the vessel go forward.

The rising screw blades are each 20 feet long and when revolving span a diameter of 40 feet.

Powerful as the rising screw is, it would not be equal to lifting the ship from earth and keeping it in the air but for the help it receives from the gas-filled cylinder. It will be seen that the beating of these huge wings, always driving the air downward, must send a gale against the car and the heads of its occupants. To protect both, there is a screw having the form of a parachute.

The rim of this extends over the sides of the car, so that the gale from above slides off on all sides without being felt by the passengers. This parachute is relied upon also in time of accident to make the ship sink slowly to earth instead of taking a disastrous drop.

**FRIENDS ANXIOUS
TO AVENGE DEAD**
Posses Are Forming in Many Places
to Take Part in Man Hunt.

Oklahoma City, June 7.—With
posses forming in many places, bend-
ing every effort toward the capture
of Alfred Hunter, alias James King-
bury who killed Sheriff Garrison, in-
tense excitement prevails in the en-
tire western section of the state.

Taloga, Arapahoe, Chickasha sher-
iffs and peace officers from other dis-
tricts have joined in the search, while
the posses of civilians are large.

Buck Garrett, chief of police of
Armore and close friend of the dead
man, passed through Oklahoma City
yesterday, hurrying to the scene. Gar-
rett shipped his own mount and row-
ed that he would take to the field

when train service fails should he be
unable to reach the immediate vicin-
ity.

Bill Tilghman, sheriff of Lincoln
county, another close friend to Sher-
iff Garrison, and Bill Grace, sheriff of
Pottawatomie county, are on the
trail. Grace reached here yesterday
noon. He had learned of the tragedy
Friday night, shortly after it occur-
ed, and tried in every way to get in
the chase, but could not get the early
start.

Major A. J. Washington of the state
rifle team, Forest Van Shike, one of
the expert riflemen of the state, and
Sam Bender, another man who has
established a record as a shot, have
volunteered their services in the hunt
for the negro murder, Alf Hunter,
and left the city yesterday to join
the posses in their chase into King-
fisher.

WATER IN THE RESERVOIR GONE

Thirty Feet of the Dam Undermined and in Less than One Hour Reservoir Is Empty

Ada is out of water. That is so
far as the city water is concerned
and every industry that is using the
water will do doubt be shut down
indefinitely or make other arrange-
ments for water.

Yesterday afternoon about 3 o'clock
a small leak was noticed on the
east side of the dam, and kept get-
ting larger but did not reach any
dangerous proportion until 1 o'clock
today when suddenly it became large-
er washing out 30 feet of earth under
the dam and leaving only the con-
crete swinging. A place washed out
large enough to almost run a box
car under. The dam was visited this
morning by several members of the
council and Engineer Whittaker of
the cement plant who advised with
the council and a line of action was
decided on to stop the leak, but the
burst came before any thing could
possibly be done to stop it. The
council was arranging to put in a
willow mat and several sacks of
sand on the water side as recom-
mended by Mr. Whittaker, but could
not get to it in time. It is hard to
estimate the cost of this accident. A
phone message from the cement plant
tells us it will shut them down in-
definitely. This will throw several

hundred men out of employment,
right in the dull season of the year
besides the ice plant and the electric
light plant. Mr. Frick informs us he
will put his well in shape as quick
as possible and hopes to suffer no in-
convenience. The light plant will run
tonight as there is water enough in
the stand pipe to tide them over and
are making an effort to get water
from the oil mill and be connected
up by tomorrow. It is hoped they
will not have to stop at all.

Engineer Oneal and Contractor
Lunsden have been wired but noth-
ing has been heard from them so far.
There is about \$700 due Mr. Luns-
den on his contract, and we believe
he will come down and rebuild the
washed out part of the dam at once
and without cost to the city. How-
ever that does not remedy the serious
situation and the water famine it is
liable to cause in Ada. The coun-
cil, however, will call a meeting at
once and try and devise some means
if possible to furnish water. The well
has caved in and almost worse than
nothing. In fact, it would be dan-
gerous to attempt to fix it while the
ground is so wet and the well still
caving.

SHERIFF GARRISON'S SLAYER WOUNDED

NOW SURROUNDED IN KINGFISHER
NEIGHBORHOOD—HIS
CAPTURE SOON.

JAIL UNDER GUARD
OF SOLDIERS

Governor Haskell Orders Out Nation-
al Guard to Suppress Possible
Riots Here—Sheriff's Body
Arrives on Special.

Oklahoma City, Ok., June 7.—Fears
of a race war when Sheriff Garrison's
body arrives in Oklahoma City on a
special train at 3:30 this morning,
led Governor Haskell to call out Com-
pany M O N G Adjutant General
Canton came from Guthrie at 2:00
o'clock this morning to take com-
mand.

Some negroes were carrying guns
last evening and in one or two in-
stances slight outward demonstra-
tions, indicating possible trouble were
made.

Wounded in three places and be-
lieved to be in all but a dying con-
dition, one bullet in his hip an-
other in his abdomen and a third
in his shoulder, Alf Hunter, neg-
ro desperado, who shot and killed
Sheriff Garrison in a fierce battle in
the Gyp hills near Watonga Friday
night, spent the night in hiding near
Kingfisher.

Weak from the 24 hours of almost
unceasing flight, during which one
man has been killed another wound-
ed and the negro himself driven into
close quarters only to extricate him-
self when the posses believed their
quest was at an end, he may not be
alive when found unless his rendez-
vous is discovered within a few
hours.

Governor Haskell has offered \$500
reward for his capture.

True Story of Fight.
Hunter was first discovered in a
dugout three miles east of Watonga
Friday afternoon by Sheriff Garrison
and his deputies. He had been warned
of the approach of the officers by a
confederate, who was on the lookout
and when the party drove into the
wheat field where Hunter and a com-

panion had sought shelter behind a
strawstack both of the negroes open-
ed fire upon the officers.

The first shot hit Sheriff Garrison
in the neck, while a second bullet
penetrated his abdomen. Either
wound being (according to the physi-
cians) equally fatal.

Just as he fell he cried
"Warden, come here," and died in

Ada Evening News

OTIS B. WEAVER, Editor and Owner

Entered as second-class mail matter March 1914 at the postoffice at Ada, Oklahoma, under the act of Congress March 3, 1879.

PONTOTOC LEGISLATORS.

Representatives Huddleston and Ratliff, since their return from Guthrie, have been busily engaged in extending friendly greetings to hundreds of their constituency over the district and ascertaining from them their estimation of the services generally rendered to the state by the first state legislature.

Frank Huddleston was one of the leading farmer representatives in the legislature and especially is he well versed regarding the substantial legislation considered and enacted which reflects advantageously in behalf of the farmer people the people of whom he is one to whom he is indebted for his office and for whom he has the greatest regard. Frank Huddleston as a member of the farmers caucus in the legislature probably initiated as many movements and promoted as many practical actions in behalf of the laboring class which found actual lodgment in the laws lately placed on the statute books of this state as any other man in the legislature.

It is not definitely known whether Mr Huddleston will be a candidate for re-election but if he should become a candidate for re-election aside from the generally accepted practice of returning a legislator for a second term when he has performed reasonably satisfactory service the first term—aside from that—the fact that the actual records show the excellent character of his service the substantial results obtained by him it is the conscientious judgment of the News as a democratic paper desirous of being a strong conservator of the interests of the people of Pontotoc county that it should extend him public and unequivocal support.

Last spring when Mr Huddleston became a candidate for a state representative the News editor did not believe him strong enough to properly represent the people of this county. I voted for the Hon Randolph Lawrence, a banker the candidate offered by Roff for the legislature. Mr Huddleston's legislative record would surely dispel the thought if it should occur to any citizen that he is not capable and the News rejoices that opportunity affords to make such declaration.

CONDITIONS ALARMING.

Flood Reports Today Are of Most Serious Nature.

Armore, June 6.—The rain storm of last night has made bad matters worse so far as securing train service out of Armore is either direction of the Santa Fe. Advice received by the local agent this morning are anything but encouraging and conditions are worse than when the first heavy rain fell in this section and took out the tracks and bridges to the north and washed out the approaches to Red river bridge on the south. The Washita river this morning was within four inches as high as the highest point about three weeks ago and the water was rising at the rate of about two inches

per hour. Reports received state that water was at least twelve feet high in little canyon near Dougherty and that water was running over the railroad bridge at Pauls Valley. It is reported that water at Pauls Valley is six inches higher than during the previous flood and that the entire town is inundated. All of the bridges north are washed out and the tracks that have but recently been put in are gone.

The reports from Red river are to the effect that the river is rising steadily at the rate of two inches per hour and that no work was done all day yesterday and last night but a large force of hands have been kept employed at the bridge to keep the driftwood from destroying what work had been accomplished since the waters receded.

Reports were received though not verified that all of the work that had been done at Denison Texas in the way of repairs to the bridge across the river at that point were washed out, last night and conditions at that point are worse than before.

It is said that the heaviest rain storm of the year occurred between Pauls Valley and Chickasha through that section of the country and the entire country between those two points is under water.

All connections north of here above Berwyn has been cut off on the Santa Fe.

The agent of the Rock Island Frisco up to a late hour this morning has received no report of much damage on that line although yesterday a bridge on the main line of the Rock Island near Jefferson had washed out but was repaired and train service resumed. No reports were received this morning concerning damages.

Passenger trains came in last night and left this morning.

INVOKE INITIATIVE FOR THE LESSEES

Conferees With Governor Draft Measure for Full Issue.

Guthrie, Okla. June 4.—Under that unique provision of the constitution that reserved to the people of the new state the prerogative of initiating their own legislation doubtless will be determined the disposition of the only real burning issue left unsettled by the first legislature the sale of the school lands. Today's proceedings of the school land conference the first held under statehood which was called by Governor Haskell resulted in the partial formulation of a measure that is satisfactory to a majority of the 300 lessees present. Tomorrow it will be completed after which petitions will be circulated asking that the qualified electors consent to the measure becoming an issue to be voted upon at the November election. Five per cent of the electors are necessary to a complete petition under the constitution.

The lessees met in the supreme court chamber today and were addressed by Governor Haskell. William H. Murray Secretary L. D. Marr of the school land commission Senator J. Elmer Thomas of Lawton and others. A joint committee to draft a bill representing the lessees and the state was appointed consisting of W. M. Mitchell and J. Bohart of Caddo county, J. L. Williams of Lincoln county, J. N. Johnson of Oklahoma county, J. B. Tosh of Kiowa county and John Golobie of Logan county for the lessees and Governor Haskell, W. H. Murray, Senator

Thomas, F. H. Greer and L. D. Marr for the state.

SHERIFF GARRISON'S SLAYER WOUNDED

(Continued from Page One)

Warden Get down, Todd he has got us and will get you. Sheriff Garrison was taking deliberate aim when the first bullet struck him and both the negroes and the sheriff's guns were fired simultaneously. The officers continued their fire riddling the straw stack with their bullets until their supply was exhausted.

The negroes knowing the sheriff evidently centered their fire upon him since he was the first to receive wounds quickly in succession. Deputy M. L. Sanders wound is not dangerous and the bullet has been extracted from his hip.

After the sheriff dropped and his deputy was wounded the negroes again sought cover behind the straw stack where they remained under guard of the deputies while the remaining ones returned to Watonga for more ammunition. Hitting one dead another wounded and no ammunition there was nothing for the officers to do but stand and until reinforcements arrived. Despite their vigilance however under cover of darkness the negro made his escape and when they later set fire to the stack he was not to be found.

If one feels dull and spiritless in the spring or early summer they call it Spring Fever. But there is no such thing as a free lunch. It is the after effect of our winter habits. The nerves are month at fault. Tired worn out nerves leave us languid, lifeless and without spirit or ambition. A few doses of Dr. Shoop's Restorative will absolutely and quickly change all of these depressing symptoms. The Restorative of course won't bring you back to full health in a day or two but it will do enough in its hours to satisfy you that the remedy is reaching the tired spot. Druggists everywhere are advising its use as a splendid and prompt general tonic. It gives more vim and more spirit to the puny than any other known nerve or constitutional tonic. It sharpens a failing appetite aids digestion frees sluggish livers and kidneys, and brings new life strength and ambition. Test it a few days and be convinced.

G. M. RAMSEY

Indigestion

Stomach trouble is but a symptom of and not itself a true disease. We think of Dyspepsia, Heartburn and Indigestion as real diseases, yet they are symptoms only of a certain specific nerve sickness—nothing else. It was this fact that first correctly led Dr. Shoop in the creation of this now very popular Stomach Remedy—Dr. Shoop's Restorative. Going direct to the stomach nerves, alone brought that success and favor to Dr. Shoop and his Restorative. Without that original and highly vital principle, no such lasting accomplishments were ever to be had. For stomach distress, bloating, biliousness, bad breath and sallow complexion, try Dr. Shoop's Restorative—Tablets or Liquid—and see for yourself what it can and will do. We sell and cheerfully recommend.

Dr. Shoop's Restorative

CARELESS BOYS.

Loafers Around the Depots Should Be Locked Up—Several Almost Serious Accidents.

It seems a lot of boys in Ada are inclined to loaf around the depots at train time each day. For the last few days they have been very noisy in evidence, climbing over cars and playing ball etc., wherever it is convenient. The reporter of the News has noted three times how near boys have come to being killed but has refrained heretofore from mentioning it, but Saturday morning after seeing a boy come so near being run over he can not refrain from calling attention to it. Three or four boys were playing on the tracks in front of the depot, when the switch engine with a train of cars was backing down the main line, a boy carelessly playing on the tracks would have been run over had not bystanders began yelling at him. He paid no attention whatever to the whistling of the engine. Another boy a few days ago was fooling with the air hose at the rear of a train standing on the siding when the engine bumped the other end of the train, a negro happened to be standing near and jerked the boy away or he would have been killed, also another boy climbing through the cars in the yards the other day was knocked to the ground. Of course it is always the railroad company's fault when an accident happens, and the first thing to do is to sue the railway company, when your boy has got no earthly business around the depot. He should be at home or at school and when school is out find something for him to do. There is a city ordinance against boys playing around railway depots or on their tracks, and it should be enforced, and the News expects here after when boys are found loitering around depots and jumping on trains to publish their names, and some of you daddys will perhaps be surprised when you find out your boy is doing such things.

Biff! Bang! Boom!

GIVEN AWAY.
A \$25.00 Suit, also some free pressing. For particulars call at Nash's Tailor Shop. d59

The Normal Will Run Six Weeks.

On last Saturday it was learned that the governor had vetoed the bill appropriating \$1500 to each county on the east side of Oklahoma. County Supt. Pierce got the conductor and instructors together at once, and organized for the regular county institute of four weeks which the law requires.

The instructors in their liberality agreed to give the county two weeks service free, equal to \$50 each, and continue the normal six weeks instead of four weeks. So Pontotoc county will have six weeks instead of four weeks.

There will be a fee of \$3.00 charged as per law for every one who attends. This is necessary to defray the expense of running the normal in addition to what the county commissioners allow.

All teachers who are holding Oklahoma or Federal certificates that are still in force, by attending the normal will have them extended for a length of time equal the time for which the certificate was originally issued.

It is hoped that every teacher in the county will take advantage of this normal, and enlist at once. The work is of a high order.

Shocked by Lightning.

T. E. Cullins, living north of Capital Hill addition, was standing in the door of his home yesterday morning when lightning struck some where near and he was knocked to the floor. He was not injured in any way except a little frightened.

Cold Storage Candy.

Mr. T. O. Cullins is up to date on the candy proposition. He has put in a candy refrigerator that keeps his candies cool and nice through the hot season. It has three apartments, one for ice and two for candy. This insures nice fresh candy at all times.

Store closed tomorrow for marking goods down. 20 sales people wanted. Be on time Wednesday morning 8:30, June 10th
Big Sale Begins.

GRAND LEADER, Ada.

The Grand Leader, Ada, Okla.
Interest to the ladies—Our experienced trimmer, Miss Hattie Adams will only be with you two more weeks. Right now you may need a stylish mid-summer hat. Notice the prices we advertise on our Big Bill for two weeks only. Begin Wednesday June 10th. Plenty clerks to wait on you.

We are now prepared to manufacture on short notice anything you may want that is practical to be constructed of concrete.

DANGER IN DELAY

Kidney Diseases Are Too Dangerous to Neglect

The great danger of kidney troubles is that they get a firm hold before the sufferer recognizes them. Health is gradually undermined. Backache, headache, nervousness, lameness, soreness, lumbago, urinary troubles, Bright's disease follow in merciless succession. Don't neglect your kidneys. Cure the kidneys with the certain and safe remedy, Doan's Kidney Pills.

B. F. Mills, of Ardmore, I. T., tailor and dyer, residing at 509 West Main street, says: "In the month of May, 1902, I gave for publication a testimonial recommending Doan's Kidney Pills. They cured me of a pain in my back, never severe enough to cause me to lay off work, but sufficient to cause me more pain than one should endure when Doan's Kidney Pills can be easily obtained. I cannot add anything to my original statement today except that I have exerted myself in many ways, but have never had the slightest symptom of a recurrence of my old trouble. Doan's Kidney Pills cure absolutely."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

Boy of 14 Confesses Three Murders.

Norwood, Mass., June 6.—After starting the police today by declaring that he had killed two boys in Brooklyn last March, Anthony Santo, a 14-year-old boy, later in the day told the authorities that he was guilty of the killing of 6-year-old Louise Slauca at Dedham on May 17. The death of the girl has been a mystery. Her body was found in a field. The boy's mind has been affected by illness.

NO CHARGE FOR LAYING YOUR MATTING OR LENOLEUM

I surely would not send it free unless I was certain that Dr. Shoop's Magic Ointment would stand the test. Remember it is made expressly and alone for swollen, painful, bleeding or itching piles, either external or internal. Large jar 50 c. Sold by

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure it with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from ten drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address: F. J. CHENEY & Co., Toledo, Ohio.
Sold by Druggists, 75c.

Brother Massey, Gone.

Rev. E. L. Massey beloved pastor of the North Ada M. E. church, south departed from Ada this afternoon for the home of his boyhood, Moorefield Ark. His family accompanied him.

The Rev. Massey is afflicted with the dread and unrelenting disease of pernicious anemia. Over at Moorefield, the residence of his youth where nestles the old homestead and near by the placid waters of the old swimming hole enfolded in banks of verdant green in which there is buried the roots of the massive oaks, Brother Massey is gone and there he will view the old familiar land marks, sit within the shade of the clinging vines in the old rocking chair at the end of the porch and for a little while between his long and quiet rests he may wander down and lounge under the shades near the old swimming place while the reminiscences of the happy boyhood days may lead enchantment and for a little while and to some extent surcease the pain that must envelope his poor wasted frame and the sorrow that must distract his christian heart, that he must soon answer the summons which shall call him from the support and association of a loving family and from the ripening field, the sheaves of which were always responsive to his Godly sayings.

The prayers of the christian people of Ada will follow Brother Massey to his old home, and should perchance a great providence interpose and he be spared to continue his pastoral benefactions at Ada, all the community will rejoice.

OPEN AIR WAR ON PNEUMONIA

OPEN AIR WARD - WARD - AWNING'S DOWN

That fresh air is the best kind of medicine for almost every kind of disease which in any way affects the respiratory organs is coming more and more to be realized. Years ago persons suffering from bronchitis, pneumonia and kindred ailments were guarded with the most zealous care lest the least whiff of fresh, cool air should strike them or even enter the room where the patient was confined. And to the common mind even to-day pneumonia is associated with warm rooms protected from every draught, with efforts to keep the temperature equable. But such methods no longer receive the endorsement of the professional men whose business it is to keep pace with the latest developments of medical and surgical science. It is no longer the closed room where the pneumonia patient is kept sheltered but in the apartment where the greatest amount of fresh air can be secured. Perhaps the Presbyterian hospital of New York has taken the most advanced steps in respect to this open air treatment for pneumonia, and a visit to their roof ward would come as a shock and a revelation to many who still hold to the old method of treatment.

There on that high, exposed place, with only canvas awnings to shelter from snow or rain are to be seen a score or more of patients on iron beds, their pallid faces upturned to the winter sky, their breath frosted by the keen wind, and the falling light of the bleak winter day giving an aspect of utter dreariness to the wind-swept space.

"These," said the doctor in attendance, with a comprehensive sweep of arm over the still, white faces, "are our pneumonia patients. We have now about 45 in all. Here is where we bring them to combat the disease. See this one—high fever, delirium when brought in, now resting comparatively easy—asleep, as you may see. This other, a child four years old—here, put your arms under the cover—there, now, keep still and go to sleep. Afraid of the dark? It won't hurt you. Go to sleep now. You'll wake up feeling all right."

Yet here were pneumonia patients, many of tender years, exposed to every winter blast that blew; no roof overhead, only an awning that could be slid over rods in case of rain or sleet or snow. It seemed barbaric. The doctor said that it was only revolutionary.

Here is Dr. William P. Northrup of the visiting staff of the Presbyterian hospital, and it was due to his strong faith in this radical idea, and to his insistence on the virtues of the open-air treatment for all suffering from pneumonia and acute infectious diseases, such as typhoid, scarlet fever, diphtheria, etc., that this open-air ward was established on the roof of the hospital.

"It is one sense it is an experiment," Dr. Northrup said, "and in another it is not. I have employed the treatment in private practice and have been more than satisfied with the result. It is an experiment only in the sense that this is the first time it is being tried out in a hospital and on a large scale. It was only at the beginning of this winter that the ward was made ready for the reception of pneumonia patients. That is the only type of disease that we are treating in it now."

"The result has been satisfactory. It has been conclusively shown that no harm has followed the sending of the patients directly into the open air, and conspicuous benefits have been noted. The patients are less nervous, their sleep is better, and this conserves their strength; they are able to take more nourishment, and once past the crisis their recovery is more rapid."

"It is not claimed that the open-air treatment kills bacteria. It is not even sure that it shortens the period of the disease. But it is sure that it enables the patient to bear up against the poison, helps him throw it off, renders breathing less difficult, induces restful sleep, increases appetite, aids the assimilation of food—in short, contributes in every way to his betterment and harms him in no way at all."

The establishment of the open-air ward was the result of Dr. Northrup's

recommendations and the munificence of Mrs. W. K. Vanderbilt, who bore the expenses of the undertaking, and who has shown much interest in the experiment, being a frequent visitor to the institution.

What led to the adoption of the open-air ward was the successful outcome of an experiment which directly preceded the permanent installation of the ward.

"A portion of the roof," Dr. Northrup explained, "was extemporized into a roof garden for the benefit of the sick children who were sent to the hospital for treatment. A framework of iron piping, covered with canvas was made to lean to, around the sides of which canvas curtains were adjusted. The arrangement was crude, but did good work in summer and early fall. What was pronounced a very cozy place for a family picnic party in September or October was by the same persons denominated desolate in November and December. However, it was airy, well sunned, and endurable. The children spent six hours a day there all winter, the entire ward being emptied out upon the roof, while their ward below on the first floor was well blown out through the wide-open windows."

"What kind of cases were sent to the roof? All cases. On many days every case in the children's ward was sent to the roof. Exceptionally, where the case was considered unfit for removal, such as one having a weak heart, or one just recovering from an operation, or when an extension apparatus was attached to the bed, a child or two remained in the ward. This was regrettable, because the ward could not then be adequately aired through wide-open windows. By all cases I mean pneumonia in all stages, appendicitis, meningitis, burns, fractures, etc."

"Most onlookers have wished to know details about pneumonia cases taken out of doors on the roof. All pneumonia cases in the height of fever, while the stimulating effect of the pneumotoxin was full on, were regularly on the list to go to the roof for six hours on pleasant days. That did not mean avoiding winds or cold with sunlight, but avoiding rain or snow."

"It has been noted by the nurses that the children on rainy days, after being confined to the ward all day, become restless and peevish toward evening. When returned from a good airing on the roof they are hungry and sleepy. At night their sleep is quiet, profound, unbroken."

"This 'roof ward' only illustrates the greater emphasis now being laid by the medical profession on fresh-air treatment."

POISONING FROM MOTOR GASES.

Prove in Some Cases Very Harmful to Motor Occupants.

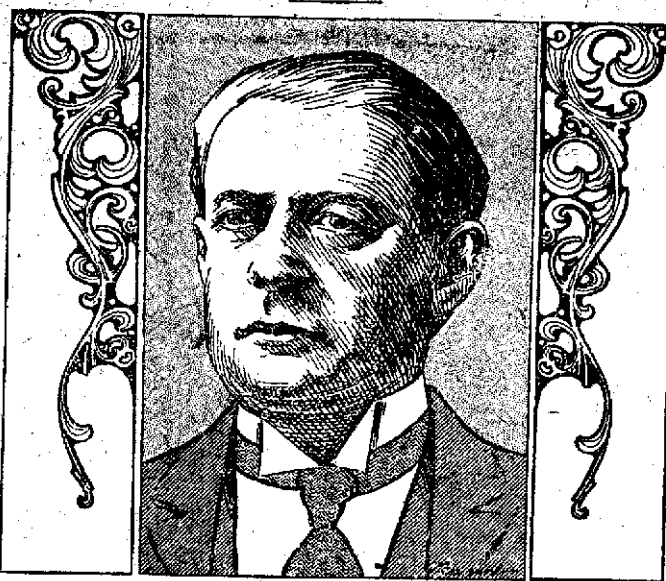

A curious and interesting fact regarding what may be called "automobile poisoning" has been recently communicated to the Paris Society of Legal Medicine by Mr. Marcel Briand, as reported to La Nature. Says this paper:

"The waste gases are capable, if the journey is a long one, of producing real symptoms of poisoning. Some automobilists have actually been obliged to give up their favorite sport because of the gases which, penetrating in small quantities even to the interior of the vehicle, cause them persistent trouble. The waste gases not being adapted for contact with our bronchial tubes, it is proper to notify the automobile makers that the floors of their machines should be made as tight as possible, in order that passengers may be protected from these products, which may, at the very least, cause distressing headaches."

Where They Went.

A business concern in Park row which runs about all night had missed scores of incandescent globes lately. Since these globes are fairly expensive, and the item of loss had become pretty sizable, a detective was put on the job. It took him just 24 hours to find that the globes were as good as cash over the bars of the Park row and Bowery gin-mills—one globe, one drink of whisky.—New York Sun.

FAVORS INTERNAL WATER WAYS

SENATOR NEWLANDS

United States Senator Francis Griffith Newlands, who spoke at the annual dinner of the Traffic club of Chicago on "The Co-ordination of Rail and Water Transportation," is an enthusiastic advocate of internal water ways. He was born in Natchez, Miss., Aug. 28, 1848, studied for two and a half years at Yale college and at the Columbian College Law School, Washington, was admitted to the bar in the District of Columbia and practiced law in San Francisco until 1888, when he became a citizen of Nevada. From 1893 to 1903 he was a representative in congress. He became senator in 1903.

LION AFRAID OF BOARHOUND. IN COSMOPOLITAN NEW YORK.

Tamers Use Big Dogs to Keep Unruly Charges in Subjection.

The boarhound growled, and the great yellow lion leaped back in fear. "The lion could kill the hound," the trainer said, "but he doesn't think so. He thinks the hound could easily kill him."

"Why?" "When the lion was a cub, this boarhound, full-grown, lived in the cage with him. The big dog could, of course, lick the little cub, and the cub therefore feared and respected him. Now the cub is grown up, but he still thinks the hound is the better man."

"We rear a cub with a full-grown hound in this way for a reason. The hound is a protection to us, trainers afterward, when the cub is grown; for then, should he become rabid, one look from the dog will send him, subdued and ashamed, slinking off to the cage's farthest corner."

INTERESTED IN WEATHER LORE.

University Students Taking Up the Science of Meteorology.

A steady increase of interest in meteorological education is manifest throughout the country, as, in fact, throughout other civilized nations. In

A Restaurant Example of the Ever Striking Side of the City.

Of course New York is cosmopolitan and it isn't extraordinarily new to call attention to the fact. But the way that it is borne in upon each of us always makes an appeal as something quite novel, says the New York Sun.

For instance, the day's news with the various names of persons who have done something to get them mentioned is proof enough of cosmopolitanism. But here's another example:

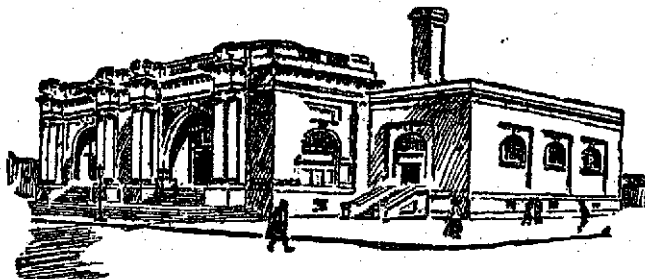

A downtown restaurant whose proprietor and waiting force are French was in full blast the other evening. At a table very near the door sat an Italian city official, chatting briskly with his Sicilian friends, three in number. Three feet away, at the next table, sat two men who spoke Spanish. Judged from the speech, one was of Andalusia the other of Castile.

At the table next them, separated again by three feet, was a man reading a German comic paper. He spoke in French to the waiter.

Oh, yes, there were English-speaking persons there.

Captain Puts on His Red Necktie. No matter how small the vessel nor how impecunious may be the skipper,

ROMAN BATH FOR NEW YORK

The New Free Bath in New York Which Rivals the Sumptuous Establishments of Old Rome.

The most pretentious thing in the way of free public baths yet attempted by any American city has been opened in New York in the form of a pool and compartment bathhouse to be open in all seasons which is said to rival the sumptuous baths of Imperial Rome.

general, instruction in meteorology is considered as a part of the courses in geology, geography or physical geography; but in two universities, George Washington and Cornell, courses have been offered in the higher mathematics and physics that constitute the fundamental basis of meteorology.

During 1906 there were 14 universities, colleges and scientific schools in which regular courses of instruction were given by weather bureau officials, and in five or six more the matter was in abeyance. Also there were at least 40 officials besides those conducting the above-mentioned courses who gave occasional lectures or addresses.

Convert to New Creed.

At a dinner given in honor of Augustus Thomas, the playwright, Mr. Thomas discussed his recent efforts at writing plays about telepathy, the occult, etc., and said:

"I am compelled to admit that the occult is becoming popular. Only the other day a chorus girl was entering the lobby of a theater when she met the manager."

"Well, I declare, Mr. Brown," she exclaimed, "if this isn't odd. Here I was just thinking of you this minute, and now you turn up. I always did believe in osteopathy."

Innocence.

Small Brother—I don't see that you're growin' very fat, sis. What you scared of?

Big Sister—Why, I'm not! What put that into your head?

Small Brother—Well, when that fellow was in the parlor with you last night, I heard you say: "Ain't I gettin' heavy?"

Like Babies.

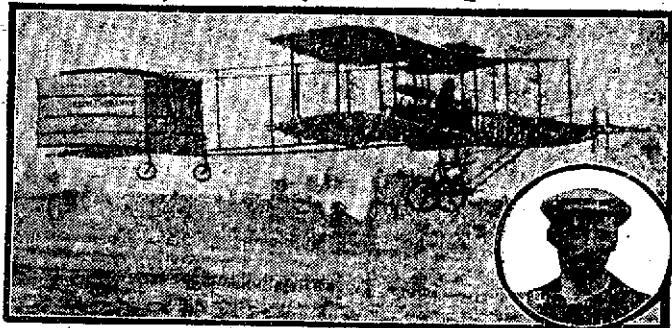

She—There is something awful funny in these accounts of prize fights.

He—What is it?

She—They talk of one fighter putting another fighter to sleep. How do they do it? Do they drug them?

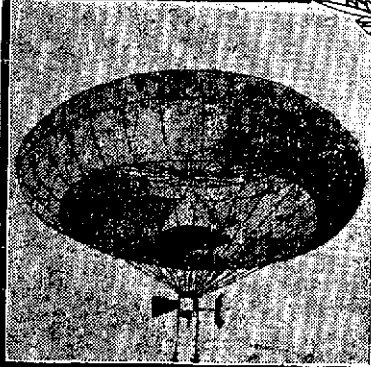

He (sarcastically)—Oh, no! They just cuddle 'em and sing 'em lullabies till they drop off and smile in slumber at the angels' whispers.

Is AIRSHIP PROBLEM SOLVED?

MR. FARMAN ON HIS AIRPLANE

M. HENRY FARMAN

FERON'S AIR SHIP

A FERON

This question has been asked time and again in the past but it must be asked again with increased emphasis in view of the recent remarkable feat of M. Henry Farman, the French aeronaut, who made a perfect circle in his aeroplane at Paris, thereby winning the Deutsch-Archdeacon prize of \$10,000. The circle which Farman described had a radius of one kilometer, almost five-eighths of a mile, and during the entire flight the aeroplane appeared to be under perfect control, displaying rare equilibrium and making the continuous turn on an even keel. The Deutsch-Archdeacon prize had been offered to the aviator, or aeronaut, who first succeeded in completing a circular kilometer in the air.

As a second accomplishment M. Farman demonstrated beyond doubt that his aeroplane has solved for all time the problem of aeronautics, that the heavier-than-air power kite, and not the gas-bag flying machine, is the airship of the future. The flight of the Farman aeroplane marks a record in aerial navigation.

The third thing M. Farman did was to predict the speedy inauguration of an aeroplane omnibus service between Paris and London, a distance of 287 miles, with the possibility of the service being extended to all parts of Europe and even to New York. It is simply a question now of determining how large the aeroplane must be to fly thousands instead of merely hundreds of miles.

Wildly imaginative as it may seem at the present time, the idea of constructing aeroplanes capable of flying from New York to London or Paris is receiving encouragement from deep thinking scientists and inventors interested in aeronautics whose opinions have weight and who are generally credited with knowing what they are talking about.

The Farman aeroplane, which has opened a new field for speculation as to the future of aeronautics, resembles a huge dragon fly with upper and lower sets of wings. On the under side are four bicycle wheels upon which the machine glides along the ground until it has gathered sufficient impetus to rise from the ground and commence its flight. The motor and operator are situated between the two front lateral wings, and the course of the machine is governed by a small aeroplane placed in front. The machine is propelled by two revolving blades in the rear. These act on the same principle as the screws of a steamship.

It is interesting to note that the late Prof. Langley is in reality responsible for the success of the Farman aeroplane. M. Farman went ahead just where Prof. Langley left off and has embodied in his flying machine all the correct principles and theories governing the Langley aeroplane.

Very little can be told at present as to the size or capacity of the aeroplanes for the projected London to Paris service. Each aeroplane will necessarily have to be many times larger than the machine with which M. Farman won the Deutsch-Archdeacon prize.

As stated above, the present type of aeroplane starts by gliding along the ground until sufficient impetus has been gathered to give it a lifting power. Then it gradually rises to be guided along in any direction desired by the operator and propelled by the motor-driven propeller blades behind. This method of getting a start, it has been suggested, may be improved upon by following out the idea of Prof. Langley. His plan was to provide a launching platform several feet above ground to be reached by an inclined plane. The Langley idea was to haul or propel the aeroplane up the inclined plane at a good speed and then to project it from the platform out into open space, where the aeroplane was to take care of itself by skimming

along through the air. Instead of falling, and while Farman and Dumont and other aeronauts of Europe are busy working on the problem of air navigation, American inventors are not idle. Mr. Arthur Feron, a New York architect, is the latest experimenter in aeronautics to command attention. He claims to have solved the problem of aerial flight by means of a machine that is heavier than air yet not a dead weight in the atmosphere. He has invented an airship circular in the main points of its structure, which, like a huge pinwheel spins its way from earth to the higher levels.

Feron is the first man to give practical expression to an idea which has long possessed students of the aerial navigation problem—the idea that aluminum might be substituted for silk or other textile as a strong tank for the gas.

Although oxygen gas is used by Mr. Feron as an agent of buoyancy, his device is not a dirigible balloon. It is a flying machine in as full a sense of the word as the aeroplanes of the Wright brothers or of Farman, but it is made of finest aluminum.

The significance of this departure, attended as it has been by success, is more apparent to experts in aeronautics than to the lay mind. But the Feron flyer has one quality which all can appreciate—it flies. This has been proven by experiments made with models constructed on varying scales.

Mr. Feron does not depend entirely upon the gas to keep his machine in the air. It is intended only to lighten the task of the rising screw, which is the soul of this flyer. The airship is composed of two distinct parts, which may be described as the upper and the lower works. In the upper works is the cylindrical aluminum bag, resembling a huge crown. It has a diameter of 95 feet. It has 32 air tight compartments. From the cylinder hang the cords that hold a car which will accommodate three persons besides the operator.

The lower works consist of the basket or car, ten feet square and five feet deep; the rising screw, the propellers and steering gear and motor. There are two "decks" to the car. On the lower one, or the bottom, rests the motor and all machinery for working the rising and propelling screws. The upper deck, for the use of the passengers, is fitted on a small scale with facilities for comfort. The operator's place also is here, with the telescope, compass, barometer and other instruments needed by aerial navigators close at hand.

The rising screw is set upon the end of an upright shaft which passes from the machine compartment through the main deck to a point 15 feet above the rim of the car. The rising screw has two blades shaped like the blades of a steamship propeller. Its motion, however, is horizontal. It pushes the air beneath it and makes the airship mount, where the water's propeller pushes the water behind it and makes the vessel go forward.

The rising screw blades are each 20 feet long and when revolving span a diameter of 40 feet.

Powerful as the rising screw is, it would not be equal to lifting the ship from earth and keeping it in the air but for the help it receives from the gas-filled cylinder. It will be seen that the beating of these huge wings, always driving the air downward, must send a gale against the car and the heads of its occupants. To protect both, there is a screw having the form of a parachute.

The rim of this extends over the sides of the car, so that the gale from above slides off on all sides without being felt by the passengers. This parachute is relied upon also in time of accident to make the ship sink slowly to earth instead of taking a disastrous drop.

FRIENDS ANXIOUS TO AVENGE DEAD

Posses Are Forming in Many Places
to Take Part in Man Hunt.

Oklahoma City, June 7.—With posses forming in many places, bounding every effort toward the capture of Alfred Hunter, alias James King-bury who killed Sheriff Garrison, intense excitement prevails in the entire western section of the state.

Tuloga, Arapahoe, Chickasha sheriffs and peace officers from other districts have joined in the search, while the posses of civilians are large.

Buck Garrett, chief of police of Ardmore and close friend of the dead man, passed through Oklahoma City yesterday, hurrying to the scene. Garrett shipped his own mount and rowed that he would take to the field.

when train service falls should be unable to reach the immediate vicinity.

Bill Thigman, sheriff of Lincoln county, another close friend to Sheriff Garrison, and Bill Grace, sheriff of Pottawatomie county, are on the trail. Grace reached here yesterday noon. He had learned of the tragedy Friday night, shortly after it occurred, and tried in every way to get in the chase, but could not get the early start.

Major A. J. Harrison of the state rifle team, Forest Van Skike, one of the expert riflemen of the state, and Sam Bender, another man who has established a record as a shot, have volunteered their services in the hunt for the negro murder, Alf Hunter, and left the city yesterday to join the posses in their chase into Kingfisher.

WATER IN THE RESERVOIR GONE

Thirty Feet of the Dam Undermined and in Less than One Hour Reservoir Is Empty

Ada is out of water. That is so far as the city water is concerned and every industry that is using the water will do doubt be shut down indefinitely or make other arrangements for water.

Yesterday afternoon about 3 o'clock a small leak was noticed on the east side of the dam, and kept getting larger but did not reach any dangerous proportion until 1 o'clock today when suddenly it became larger washing out 30 feet of earth under the dam and leaving only the concrete swinging. A place washed out large enough to almost run a box car under. The dam was visited this morning by several members of the council and Engineer Whittaker of the cement plant who advised with the council and a line of action was decided on to stop the leak, but the burst came before any thing could possibly be done to stop it. The council was arranging to put in a willow mat and several sacks of sand on the water side as recommended by Mr. Whittaker, but could not get to it in time. It is hard to estimate the cost of this accident. A phone message from the cement plant tells us it will shut them down indefinitely. This will throw several

hundred men out of employment, right in the dull season of the year besides the ice plant and the electric light plant. Mr. Frick informs us he will put his well in shape as quick as possible and hopes to suffer no inconvenience. The light plant will run tonight as there is water enough in the stand pipe to tide them over and are making an effort to get water from the oil mill and be connected up by tomorrow. It is hoped they will not have to stop at all.

Engineer Oneal and Contractor Lunsden have been wired but nothing has been heard from them so far. There is about \$700 due Mr. Lunsden on his contract, and we believe he will come down and rebuild the washed out part of the dam at once and without cost to the city. However that does not remedy the serious situation and the water famine it is liable to cause in Ada. The council, however, will call a meeting at once and try and devise some means if possible to furnish water. The well has caved in and almost worse than nothing. In fact, it would be dangerous to attempt to fix it while the ground is so wet and the well still caving.

SHERIFF GARRISON'S SLAYER WOUNDED

NOW SURROUNDED IN KINGFISHER
NEIGHBORHOOD—HIS
CAPTURE SOON.

JAIL UNDER GUARD OF SOLDIERS

Governor Haskell Orders Out National
Guard to Suppress Possible
Riots Here—Sheriff's Body
Arrives on Special.

Oklahoma City, Ok., June 7.—Fears of a race war when Sheriff Garrison's body arrives in Oklahoma City on a special train at 3:30 this morning, led Governor Haskell to call out Company M O N G Adjutant General Canton came from Guthrie at 2:00 o'clock this morning to take command.

Some negroes were carrying guns last evening and in one or two instances slight outward demonstrations, indicating possible trouble were made.

Wounded in three places and believed to be in all but a dying condition, one bullet in his hip another in his abdomen and a third in his shoulder, Alf Hunter, negro desperado, who shot and killed Sheriff Garrison in a fierce battle in the Gyp hills near Watonga Friday night, spent the night in hiding near Kingfisher.

Weak from the 24 hours of almost unceasing flight, during which one man has been killed another wounded and the negro himself driven into close quarters only to extricate himself when the posses believed their quest was at an end, he may not be alive when found unless his rendezvous is discovered within a few hours.

Governor Haskell has offered \$500 reward for his capture.

True Story of Fight.

Hunter was first discovered in a dugout three miles east of Watonga Friday afternoon by Sheriff Garrison and his deputies. He had been warned of the approach of the officers by a confederate, who was on the lookout and when the party drove into the wheat field where Hunter and a com-

panion had sought shelter behind a strawstack both of the negroes opened fire upon the officers. The first shot hit Sheriff Garrison in the neck, while a second bullet penetrated his abdomen either wound being (according to the physicians) equally fatal. Just as he fell he cried: 'Warden, come here,' and died in three minutes. When Sanders fell, he cried to (Continued on Page Two)

PONTOTOC LEGISLATORS.

Representatives Huddleston and Radtiff, since their return from Guthrie, have been busily engaged in extending friendly greetings to hundreds of their constituency over the district and ascertaining from them their estimation of the services generally rendered them by the first state legislature.

Frank Huddleston was one of the leading farmer representatives in the legislature and especially is he well versed regarding the substantial legislation considered and enacted which reflects advantageously in behalf of the farmer people the people of whom he is one to whom he is indebted for his office and for whom he has the greatest regard. Frank Huddleston as a member of the farmers caucus in the legislature probably initiated as many movements and promoted as many practical actions in behalf of the laboring class which found actual lodgment in the laws lately placed on the statute books of this state as any other man in the legislature.

It is not definitely known whether Mr. Huddleston will be a candidate for re-election but if he should become a candidate for re-election aside from the generally accepted practice of retiring a legislator for a second term when he has performed reasonably satisfactory service the first term—aside from that—the fact that the actual records show the excellent character of his service the substantial results obtained by him it is the conscientious judgment of the News as a democratic paper desirous of being a strong conservator of the interests of the people of Pontotoc county that it should extend him public and unequivocal support.

Last spring when Mr. Huddleston became a candidate for a state representative the News editor did not believe him strong enough to properly represent the people of this county. I voted for the Hon. Randolph Lawrence, a banker the candidate offered by Roff for the legislature. Mr. Huddleston's legislative record would surely dispel the thought if it should occur to any citizen that he is not capable and the News rejoices that opportunity affords to make such declaration.

CONDITIONS ALARMING.

Flood Reports Today Are of Most Serious Nature.

Ardmore, June 5.—The rain storm of last night has made bad matters worse so far as securing train service out of Ardmore is either direction of the Santa Fe. Advice received by the local agent this morning are anything but encouraging and conditions are worse than when the first heavy rain fell in this section and took out the tracks and bridges to the north and washed out the approaches to Red river bridge on the south. The Washita river this morning was within four inches as high as the highest point about three weeks ago and the water was rising at the rate of about two inches

per hour. Reports received state that water was at least twelve feet high in little canyon near Dougherty and that water was running over the railroad bridge at Pauls Valley. It is reported that water at Pauls Valley is six inches higher than during the previous flood and that the entire town is inundated. All of the bridges north are washed out and the tracks that have but recently been put in are gone.

The reports from Red river are to the effect that the river is rising steadily at the rate of two inches per hour and that no work was done all day yesterday and last night but a large force of hands have been kept employed at the bridge to keep the driftwood from destroying what work had been accomplished since the waters receded.

Reports were received though not verified that all of the work that had been done at Denison Texas in the way of repairs to the bridge across the river at that point were washed out, last night and conditions at that point are worse than before.

It is said that the heaviest rain storm of the year occurred between Pauls Valley and Chickasha through that section of the country and the entire country between those two points is under water.

All connections north of here above Berwyn has been cut off on the Santa Fe. The agent of the Rock Island at Frisco up to a late hour this morning has received no report of much damage on that line although yesterday a bridge on the main line of the Rock Island near Jefferson had washed out but was repaired and train service resumed. No reports were received this morning concerning damages.

Passenger trains came in last night and left this morning.

INVOKE INITIATIVE FOR THE LESSEES

Conference With Governor Draft Measure for Fall Issue.

Guthrie, Okla. June 4.—Under that unique provision of the constitution that reserved to the people of the new state the prerogative of initiating their own legislation doubtless will be determined the disposition of the only real burning issue left unsettled by the first legislature the sale of the school lands. Today's proceedings of the school land conference the first held under statehood which was called by Governor Haskell resulted in the partial formulation of a measure that is satisfactory to a majority of the 300 lessees present. Tomorrow it will be completed after which petitions will be circulated asking that the qualified electors consent to the measure becoming an issue to be voted upon at the November election. Five per cent of the electors are necessary to a complete petition under the constitution.

The lessees met in the supreme court chamber today and were addressed by Governor Haskell, William H. Murray, Secretary L. D. Marr of the school land commission, Senator J. Elmer Thomas of Lawton and others. A joint committee to draft a bill representing the lessees and the state was appointed consisting of W. M. Mitchell and J. Bohart of Caddo county, J. L. Williams of Lincoln county, J. N. Johnson of Oklahoma county, J. B. Tosh of Kiowa county and John Golobie of Logan county for the lessees and Governor Haskell, W. H. Murray, Senator

Thomas, F. H. Greer and L. D. Marr for the state.

SHERIFF GARRISON'S SLAYER WOUNDED

(Continued from Page One)

Warden Get down, Todd he has got us and will get you.

Sheriff Garrison was taking deliberate aim when the first bullet struck him and both the negroes and the sheriff's guns were fired simultaneously. The officers continued their fire riddling the straw stack with their bullets until their supply was exhausted.

The negroes knowing the sheriff evidently centered their fire upon him since he was the first to receive wounds quickly in succession. Deputy M. L. Sanders wound is not dangerous and the bullet has been extracted from his hip.

After the sheriff dropped and his deputy was wounded the negroes again sought cover behind the straw stack where they remained under guard of the deputies while the remaining ones returned to Watonga for more ammunition. Having one dead another wounded and no ammunition there was nothing for the officers to do but stand and until reinforcements arrived. Despite their vigilance however under cover of darkness the negro made his escape and when they later set fire to the stack he was not to be found.

If one feels dull and spiritless in the spring or early summer they call it Spring Fever. But there is no fever usually. It is the after effect of our winter habits. The nerves are mostly at fault. Tired worn out nerves leave us languid, lifeless and without spirit or ambition. A few doses of Dr. Shoop's Restorative will absolutely and quickly change all of these depressing symptoms. The Restorative of course won't bring you back to full health in a day or two, but it will do enough in 15 hours to satisfy you that the remedy is teaching the tired spot. Druggists everywhere are advising its use as a splendid and prompt general tonic. It gives more vim and more spirit to the puny than any other known nerve or constitutional tonic. It sharpens a failing appetite, aids digestion, frees sluggish livers and kidneys, and brings new life, strength and ambition. Test it a few days and be convinced.

G. M. RAMSEY.

Indigestion

Stomach trouble is but a symptom of and not itself a true disease. We think of Dyspepsia, Heartburn and Indigestion as real diseases, yet they are symptoms only of a certain and curable nerve sickness—nothing else. It was this fact that first correctly led Dr. Shoop in the creation of that now very popular Stomach Remedy—Dr. Shoop's Restorative. Going direct to the stomach nerves, alone brought that success and relief to Dr. Shoop and his Restorative. With out that original and highly vital principle, no such lasting accomplishments were ever to be had. For stomach distress, bloating, flatulency, bad breath and sour eructation, try Dr. Shoop's Restorative—Tablets or Liquid—and see for yourself what it can and will do. We sell and cheerfully recommend.

CARELESS BOYS.

Loafers Around the Depots Should Be Locked Up—Several Almost Serious Accidents.

It seems a lot of boys in Ada are inclined to loaf around the depots at train time each day. For the last few days they have been very much in evidence climbing over cars and playing ball etc wherever it is convenient. The reporter of the News has noted three times how near boys have come to being killed but has refrained heretofore from mentioning it but Saturday morning after seeing a boy come so near being run over he can not refrain from calling attention to it. Three or four boys were playing on the tracks in front of the depot when the switch engine with a train of cars was backing down the main line a boy carelessly playing on the tracks would have been run over had not bystanders began yelling at him. He paid no attention whatever to the whistling of the engine. Another boy a few days ago was fooling with the air hose at the rear of a train standing on the siding when the engine bumped the other end of the train a negro happened to be standing near and jerked the boy away or he would have been killed, also another boy climbing through the cars in the yards the other day was knocked to the ground. Of course it is always the railroad company's fault when an accident happens and the first thing to do is to sue the railway company, when your boy has got no earthly business around the depot. He should be at home or at school and when school is out find something for him to do. There is a city ordinance against boys playing around railway depots or on their tracks and it should be enforced and the laws expects here after when boys are found loitering around depots and jumping on trains to publish their names and some of you dadys will perhaps be surprised when you find out your boy is doing such things

GIVEN AWAY.
A \$25.00 Suit, also some free pressing. For particulars call at Nash's Tailor Shop d59

The Normal Will Run Six Weeks.

On last Saturday it was learned that the governor had vetoed the bill appropriating \$1500 to each county on the east side of Oklahoma County. Supt Pierce got the conductor and instructors together at once and organized for the regular county institute of four weeks which the law requires.

The instructors in their liberality agreed to give the county two weeks service free, equal to \$50 each and continue the normal six weeks instead of four weeks. So Ponotoc county will have six weeks instead of four weeks.

There will be a fee of \$3.00 charged as per law for every one who attends. This is necessary to defray the expense of running the normal in addition to what the county commissioners allow.

All teachers who are holding Oklahoma or Federal certificates that are still in force by attending the normal will have them extended for a length of time equal to the time for which the certificate was originally issued.

It is hoped that every teacher in the county will take advantage of this normal and enlist at once. The work is of a high order.

Shocked by Lightning.

1 E Cullins living north of Capitol Hill addition was standing in the door of his home yesterday morning when lightning struck some where near and he was knocked to the floor. He was not injured in any way except a little frightened.

Cold Storage Candy.

Mr T O Cullins is up to date on the candy proposition. He has put in a candy refrigerator that keeps his candies cool and nice through the hot season. It has three apartments one for ice and two for candy. This insures nice fresh candy at all times.

DANGER IN DELAY

Kidney Diseases Are Too Dangerous to Neglect

The great danger of kidney troubles is that they get a firm hold before the sufferer recognizes them. Health is gradually undermined. Backache, headache, nervousness, lameness, soreness, lumbago, urinary troubles, Bright's disease follow in merciless succession. Don't neglect your kidneys. Cure the kidneys with the certain and safe remedy, Doan's Kidney Pills.

B F Mills of Ardmore I T tailor and dyer residing at 509 West Main street says: In the month of May, 1902 I gave for publication a testimonial recommending Doan's Kidney Pills. They cured me of a pain in my back, never severe enough to cause me to lay off work but sufficient to cause me more pain than one should endure when Doan's Kidney Pills can be easily obtained. I cannot add anything to my original statement today except that I have exerted myself in many ways, but have never had the slightest symptom of a recurrence of my old trouble. Doan's Kidney Pills cure absolutely.

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York sole agents for the United States. Remember the name—Doan's—and take no other.

Boy of 14 Confesses Three Murders.

Norwood Mass., June 6—After startling the police today by declaring that he had killed two boys in Brooklyn last March, Anthony Santo, a 14-year-old boy later in the day told the authorities that he was guilty of the killing of 6-year-old Louise Slauga at Dedham on May 11. The death of the girl has been a mystery. Her body was found in a field. The boy's mind has been affected by illness.

NO CHARGE FOR LAYING YOUR MATTING OR LENOLEUM IF BOUGHT AT OUR STORE

We relieve you of an unpleasant task, do our work well, and sell at the same price as the other fellow, taking into consideration quality always.

SHADE HANGING

We could not pay drayage and hang an isolated shade or two, but will hang free of charge a bill of shades or any quantity in connection with the purchase of other goods.

Refrigerators, Quick-meal Gasoline Stoves, Ball-bearing Lawn Mowers and White Mountain Freezers, to Suit Everyone.

Has it occurred to you that some refrigerators are dear at any price? The reason is this: Poor insulation causes a constant waste of ice, and poor circulation does not insure keeping the provisions pure. Ten years selling Greenland Refrigerators has demonstrated their superior qualities over many others. Buy a good one.

OPEN AIR WAR ON PNEUMONIA

OPEN AIR ROOF WARD - AVOIDING DOWNS

That fresh air is the best kind of medicine for almost every kind of disease which in any way affects the respiratory organs is coming more and more to be realized. Years ago persons suffering from bronchitis, pneumonia and kindred ailments were guarded with the most zealous care, lest the least whiff of fresh, cool air should strike them or even enter the room where the patient was confined. And to the common mind even to-day pneumonia is associated with warm rooms protected from every draught, with efforts to keep the temperature equable. But such methods no longer receive the endorsement of the professional men whose business it is to keep pace with the latest developments of medical and surgical science. It is no longer the close room where the pneumonia patient is kept sheltered but in the apartment where the greatest amount of fresh air can be secured. Perhaps the Presbyterian hospital of New York has taken the most advanced steps in respect to this open air treatment for pneumonia, and a visit to their roof ward would come as a shock and a revelation to many who still hold to the old method of treatment.

There on that high, exposed place, with only canvas awnings to shelter from snow or rain are to be seen a score or more of patients on iron beds, their pallid faces upturned to the winter sky, their breath frosted by the keen wind, and the falling light of the bleak winter day giving an aspect of utter dreariness to the wind-swept space.

"These," said the doctor in attendance, with a comprehensive sweep of arm over the still, white faces, "are our pneumonia patients. We have now about 45 in all. Here is where we bring them to combat the disease. See this one—high fever, delirious when brought in, now resting comparatively easy—asleep, as you may see. This other, a child four years old—here, put your arms under the cover—there, now, keep still and go to sleep. Afraid of the dark? It won't hurt you. Go to sleep now. You'll wake up feeling all right."

Yet here were pneumonia patients, many of tender years, exposed to every winter blast that blew; no roof overhead, only an awning that could be slid over rods in case of rain or sleet or snow. It seemed barbaric. The doctor said that it was only revolutionary.

Here is Dr. William F. Northrup of the visiting staff of the Presbyterian hospital, and it was due to his strong faith in this radical idea, and to his insistence in the virtues of the open-air treatment for all suffering from pneumonia and acute infectious diseases, such as typhoid, scarlet fever, diphtheria, etc., that this open-air ward was established on the roof of the hospital.

"In one sense it is an experiment," Dr. Northrup said, "and in another it is not. I have employed the treatment in private practice and have been more than satisfied with the result. It is an experiment only in the sense that this is the first time it is being tried out in a hospital and on a large scale. It was only at the beginning of this winter that the ward was made ready for the reception of pneumonia patients. That is the only type of disease that we are treating in it now."

"The result has been satisfactory. It has been conclusively shown that no harm has followed the sending of the patients directly into the open air, and conspicuous benefits have been noted. The patients are less nervous, their sleep is better, and this conserves their strength; they are able to take more nourishment, and once past the crisis their recovery is more rapid."

"It is not claimed that the open-air treatment kills bacteria. It is not even sure that it shortens the period of the disease. But it is sure that it enables the patient to bear up against the poison, helps him throw it off, renders breathing less difficult, induces restful sleep, increases appetite, aids the assimilation of food—in short, contributes in every way to his betterment and harms him in no way at all."

The establishment of the open-air ward was the result of Dr. Northrup's

recommendations and the munificence of Mrs. W. K. Vanderbilt, who bore the expenses of the undertaking, and who has shown much interest in the experiment, being a frequent visitor to the institution.

What led to the adoption of the open-air ward was the successful outcome of an experiment which directly preceded the permanent installation of the ward.

"A portion of the roof," Dr. Northrup explained, "was extemporized into a roof garden for the benefit of the sick children who were sent to the hospital for treatment. A framework of iron piping, covered with canvas was made to lean to, around the sides of which canvas curtains were adjusted. The arrangement was crude, but did good work in summer and early fall. What was pronounced a very cozy place for a family picnic party in September or October was by the same persons denominated desolate in November and December. However, it was airy, well sunned, and endurable. The children spent six hours a day there all winter, the entire ward being emptied out upon the roof, while their ward below on the first floor was well blown out through the wide-open windows."

"What kind of cases were sent to the roof? All cases. On many days every case in the children's ward was sent to the roof. Exceptionally, where the case was considered unfit for removal, such as one having a weak heart, or one just recovering from an operation, or when an extension apparatus was attached to the bed, a child or two remained in the ward. This was regrettable, because the ward could not then be adequately aired through wide-open windows. By all cases I mean pneumonia in all stages, appendicitis, meningitis, burns, fractures, etc."

"Most overlookers have wished to know details about pneumonia cases taken out of doors on the roof. All pneumonia cases in the height of fever, while the stimulating effect of the pneumotoxin was full on, were regularly on the list to go to the roof for six hours on pleasant days. That did not mean avoiding winds or cold with sunlight, but avoiding rain or snow."

"It has been noted by the nurses that the children on rainy days, after being confined to the ward all day, become restless and peevish toward evening. When returned from a good airing on the roof they are hungry and sleepy. At night their sleep is quiet, profound, unbroken."

"This 'roof ward' only illustrates the greater emphasis now being laid by the medical profession on fresh-air treatment."

POISONING FROM MOTOR GASES.

Prove in Some Cases Very Harmful to Motor Occupants.

A curious and interesting fact regarding what may be called "automobile poisoning" has been recently communicated to the Paris Society of Legal Medicine by Mr. Marcel Briand, as reported to La Nature. Says this paper:

"The waste gases are capable, if the journey is a long one, of producing real symptoms of poisoning. Some automobilists have actually been obliged to give up their favorite sport because of the gases which, penetrating in small quantities even to the interior of the vehicle, cause them persistent trouble. The waste gases not being adapted for contact with our bronchial tubes, it is proper to notify the automobile makers that the floors of their machines should be made at least as tight as possible, in order that passengers may be protected from these products, which may, at the very least, cause distressing headaches."

Where They Went.

A business concern in Park row which runs about all night had missed scores of incandescent globes lately. Since these globes are fairly expensive, and the item of loss had become pretty sizable, a detective was put on the job. It took him just 24 hours to find that the globes were as good as cash over the bars of the Park row and Bowery gin-mills—one globe, one drink of whisky.—New York Sun.

FAVORS INTERNAL WATER WAYS

SENATOR NEWLANDS

United States Senator Francis Griffith Newlands, who spoke at the annual dinner of the Traffic club of Chicago on "The Co-ordination of Rail and Water Transportation," is an enthusiastic advocate of internal water ways. He was born in Natchez, Miss., Aug. 23, 1848, studied for two and a half years at Yale college and at the Columbian College Law School, Washington, was admitted to the bar in the District of Columbia and practiced law in San Francisco until 1888, when he became a citizen of Nevada. From 1893 to 1903 he was a representative in congress. He became senator in 1903.

LION AFRAID OF BOARHOUND, IN COSMOPOLITAN NEW YORK.

Tamers Use Big Dogs to Keep Unruly Charges in Subjection.

The boarhound growled, and the great yellow lion leaped back in fear. "The lion could kill the hound," the trainer said, "but he doesn't think so. He thinks the hound could easily kill him."

"Why?"

"When the lion was a cub, this boarhound, full-grown, lived in the cage with him. The big dog could, of course, lick the little cub, and the cub therefore feared and respected him. Now the cub is grown up, but he still thinks the hound is the better man."

"We rear a cub with a full-grown hound in this way for a reason. The hound is a protection to us, trainers afterward, when the cub is grown; for then, should he become rambunctious, one look from the dog will send him, subdued and ashamed, slinking off to the cage's farthest corner."

INTERESTED IN WEATHER LORE.

University Students Taking Up the Science of Meteorology.

A steady increase of interest in meteorological education is manifest throughout the country, as, in fact, throughout other civilized nations. In

A Restaurant Example of the Ever Striking Side of the City.

Of course New York is cosmopolitan and it isn't extraordinarily new to call attention to the fact. But the way that it is borne in upon each of us always makes an appeal as something quite novel, says the New York Sun.

For instance, the day's news with the various names of persons who have done something to get them mentioned is proof enough of cosmopolitanism. But here's another example:

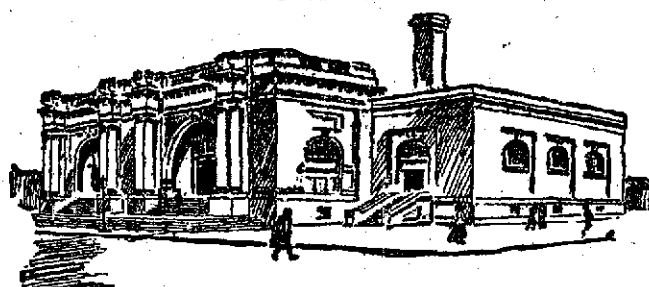

A downtown restaurant whose proprietor and waiting force are French was in full blast the other evening. At a table very near the door sat an Italian city official, chatting briskly with his Sicilian friends, three in number. Three feet away, at the next table, sat two men who spoke Spanish. Judged from the speech, one was of Andalusia the other of Castile.

At the table next them, separated again by three feet, was a man reading a German comic paper. He spoke in French to the waiter.

Oh, yes, there were English-speaking persons there.

Captain Puts on His Red Necktie. No matter how small the vessel nor how impecunious may be the skipper,

ROMAN BATH FOR NEW YORK

The New Free Bath in New York Which Rivals the Sumptuous Establishments of Old Rome.

The most pretentious thing in the way of free public baths yet attempted by any American city has been opened in New York in the form of a pool and compartment bathhouse to be open in all seasons which is said to rival the sumptuous baths of Imperial Rome.

general instruction in meteorology is considered as a part of the courses in geology, geography or physical geography; but in two universities, George Washington and Cornell, courses have been offered in the "higher mathematics and physics that constitute the fundamental basis of meteorology."

During 1906 there were 14 universities, colleges and scientific schools in which regular courses of instruction were given by weather bureau officials, and in five or six more the matter was in abeyance. Also there were at least 40 officials besides those conducting the above-mentioned courses who gave occasional lectures or addresses.

Convert to New Creed.

At a dinner given in honor of Augustus Thomas, the playwright, Mr. Thomas discussed his recent efforts at writing plays about telepathy, the occult, etc., and said:

"I am compelled to admit that the occult is becoming popular. Only the other day a chorus girl was entering the lobby of a theater when she met the manager."

"Well, I declare, Mr. Brown," she exclaimed, "if this isn't odd. Here I was just thinking of you this minute, and now you turn up. I always did believe in osteopathy."

Innocence.

Small Brother—I don't see that you're growin' very fat, sis. What you scared of?

Big Sister—Why, I'm not! What put that into your head?

Small Brother—Well, when that fellow was in th' parlor with you last night, I heard you say: "Ain't I gettin' heavy?"

there is always a "boiled" shirt and a clean collar laid carefully away to be worn when the craft enters port. At sea the captain may be very rough in his attire, but the approach of land finds him combing his hair and cropping his whiskers, if he has any, and the collar is donned, also a red necktie, which usually is flamboyant red.

Even the poorest men who bring vessels to Boston to secure loads of lumber for South American ports dress as neatly as possible when the customs boarding officer is expected to come alongside to inspect the ship's papers.

And the mates slick up too when their floating home is nearing port, so that the "old man," as the captain is familiarly termed behind his back, may not carry off all the honors of the occasion.

Looks Back on Years Well Spent.

Mrs. Mary E. Parker of Honolulu, a Congregational foreign missionary when Hawaii was foreign territory, celebrated some time ago the centennial of her birth. She has been 72 years on mission ground, a continuous missionary career without parallel. Mrs. Parker and her husband, Rev. Benjamin W. Parker, went to the Sandwich Islands as missionaries in 1832.

Like Babies.

She—There is something awful funny in these accounts of prize fights. He—What is it?

She—They talk of one fighter putting another fighter to sleep. How do they do it? Do they drug them?

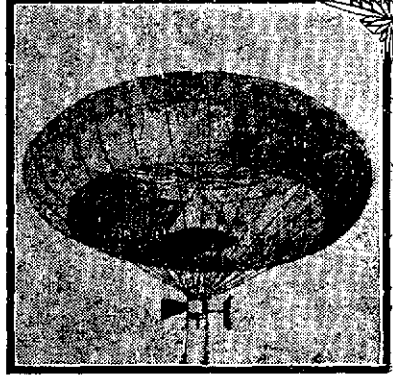

He (sarcastically)—Oh, no! They just cuddle 'em and sing 'em lullabies till they drop off and smile in slumber at the angels' whispers.

Is AIRSHIP PROBLEM SOLVED?

MR. FARMAN ON HIS AEROPLANE

M. HENRY FARMAN

FERON'S AIR SHIP

A FERON

This question has been asked time and again in the past but it must be asked again with increased emphasis in view of the recent remarkable feat of M. Henry Farman, the French aeronaut, who made a perfect circle in his aeroplane at Paris, thereby winning the Deutsch-Archdeacon prize of \$10,000. The circle which Farman described had a radius of one kilometer, almost five-eighths of a mile, and during the entire flight the aeroplane appeared to be under perfect control, displaying rare equilibrium and making the continuous turn on an even keel. The Deutsch-Archdeacon prize had been offered to the aviator, or aeronaut, who first succeeded in completing a circular kilometer in the air.

As a second accomplishment M. Farman demonstrated beyond doubt that his aeroplane has solved for all time the problem of aeronautics, that the heavier-than-air power kite, and not the gas-bag flying machine, is the airship of the future. The flight of the Farman aeroplane marks a record in aerial navigation.

The third thing M. Farman did was to predict the speedy inauguration of an aeroplane omnibus service between Paris and London, a distance of 287 miles, with the possibility of the service being extended to all parts of Europe and even to New York. It is simply a question now of determining how large the aeroplane must be to fly thousands instead of merely hundreds of miles.

Wildly imaginative as it may seem at the present time, the idea of constructing aeroplanes capable of flying from New York to London or Paris is receiving encouragement from deep thinking scientists and inventors interested in aeronautics whose opinions have weight and who are generally credited with knowing what they are talking about.

The Farman aeroplane, which has opened a new field for speculation as to the future of aeronautics, resembles a huge dragon fly with upper and lower sets of wings. On the under side are four bicycle wheels upon which the machine glides along the ground until it has gathered sufficient impetus to rise from the ground and commence its flight. The motor and operator are situated between the two front lateral wings, and the course of the machine is governed by a small aeroplane placed in front. The machine is propelled by two revolving blades in the rear. These act on the same principle as the screws of a steamship.

It is interesting to note that the late Prof. Langley is in reality responsible for the success of the Farman aeroplane. M. Farman went ahead just where Prof. Langley left off and has embodied in his flying machine all the correct principles and theories governing the Langley aeroplane.

Very little can be told at present as to the size or capacity of the aeroplanes for the projected London to Paris service. Each aeroplane will necessarily have to be many times larger than the machine with which M. Farman won the Deutsch-Archdeacon prize.

As stated above, the present type of aeroplane starts by gliding along the ground until sufficient impetus has been gathered to give it a lifting power. Then it gradually rises to be guided along in any direction desired by the operator and propelled by the motor-driven propeller blades behind. This method of getting a start, it has been suggested, may be improved upon by following out the idea of Prof. Langley. His plan was to provide a launching platform several feet above ground to be reached by an inclined plane. The Langley idea was to haul or propel the aeroplane up the inclined plane at a good speed and then to project it from the platform out into open space, where the aeroplane was to take care of itself by skimming

along through the air, instead of falling. And while Farman and Dumont and other aeronauts of Europe are busy working on the problem of air navigation, American inventors are not idle. Mr. Arthur Feron, a New York architect, is the latest experimenter in aeronautics to command attention. He claims to have solved the problem of aerial flight by means of a machine that is heavier than air yet not a dead weight in the atmosphere. He has invented an airship circular in the main points of its structure, which, like a huge pinwheel spins its way from earth to the higher levels.

Feron is the first man to give practical expression to an idea which has long possessed students of the aerial navigation problem—the idea that aluminum might be substituted for silk or other textile as a strong tank for the gas.

Although oxygen gas is used by Mr. Feron as an agent of buoyancy, his device is not a dirigible balloon. It is a flying machine in as full a sense of the word as the aeroplanes of the Wright brothers or of Farman, but it is made of finest aluminum.

The significance of this departure, attended as it has been by success, is more apparent to experts in aeronautics than to the lay mind. But the Feron filter has one quality which all can appreciate—it flies. This has been proven by experiments made with models constructed on varying scales.

Mr. Feron does not depend entirely upon the gas to keep his machine in the air. It is intended only to lighten the task of the rising screw, which is the soul of this flyer. The airship is composed of two distinct parts, which may be described as the upper and the lower works. In the upper works is the cylindrical aluminum bag, resembling a huge crown. It has a diameter of 96 feet. It has 32 air tight compartments. From the cylinder hang the cords that hold a car which will accommodate three persons besides the operator.

The lower works consist of the basket or car, ten feet square and five feet deep; the rising screw, the propellers and steering gear and motor. There are two "decks" to the car. On the lower one, or the bottom, rests the motor and all machinery for working the rising and propelling screws. The upper deck, for the use of the passengers, is fitted on a small scale with facilities for comfort. The operator's place also is here, with the telescope, compass, barometer and other instruments needed by aerial navigators close at hand.

The rising screw is set upon the end of an upright shaft which passes from the machine compartment through the main deck to a point 15 feet above the rim of the car. The rising screw has two blades shaped like the blades of a steamship propeller. Its motion, however, is horizontal. It pushes the air beneath it and makes the airship mount, where the water's propeller pushes the water behind it and makes the vessel go forward.

The rising screw blades are each 20 feet long and when revolving span a diameter of 40 feet.

Powerful as the rising screw is, it would not be equal to lifting the ship from earth and keeping it in the air but for the help it receives from the gas-filled cylinder. It will be seen that the bending of these huge wings, always driving the air downward, must send a gale against the car and the heads of its occupants. To protect both, there is a screw having the form of a parachute.

The rim of this extends over the sides of the car, so that the gale from above slides off on all sides without being felt by the passengers. This parachute is relied upon also in time of accident to make the ship sink slowly to earth instead of taking a disastrous drop.

FOUGHT OVER COUNTY SEAT

The Citizens of Eufaula Armed Themselves to Meet the Invaders From
Checotah—A Deputy Marshal
May Die From Wounds.

Eufaula, Ok., June 7.—In a fight between about fifteen Checotah persons and citizens of Eufaula this afternoon on the streets of Eufaula, F. M. Woods, deputy constable of this place, and Joseph Parmenter of Checotah, were shot. Woods probably will die. He was shot once through the body. Parmenter's wound is not dangerous. The trouble started when Constable Woods attempted to disarm Parmenter. About fifteen shots were fired in all. Immediately after the shooting J. C. Smock of Eufaula started a subscription list for paying for medical attention of both wounded men.

A Special Train Ready.

With rifles and revolvers the Checotah men came to Eufaula to attempt to remove the county seat records by force. The county clerk is said to have furnished them the keys to the courthouse and the records were to be put in sacks and sent to Checotah on a special train which was to arrive later. Eufaula citizens were armed to prevent the removal because a temporary injunction had been granted by the supreme court. At the time of the trouble an officer was there to serve the papers on the county officials, but was waiting until Monday morning to make his action legal. A special train bearing more Checotah people was waiting ready to start for Eufaula, but after the trouble they did not come. F. W. Abrams, manager of Eufaula's county seat campaign, talked to Gov. Haskell over the long distance telephone, and the governor promised to wire Checotah to cease her efforts to remove the records until they have a legal right to them. In the county seat election held in McIntosh county on May 23, the race between Eufaula, the present county seat and Checotah, was so close that it required the official count to decide it. Governor Haskell announced his decision Saturday in favor of Checotah, but Eufaula immediately served notice of a contest and obtained an injunction before the supreme court to prevent the removal of the records until the contest is decided. In the meantime Checotah decided to attempt to remove the records to that town by force.

The affair is regretted by the conservative people of both towns. The county seat contest had been bitter up to today but there had been no violence. Tonight the streets of Eufaula are being patrolled by armed men.

A dispatch from Muskogee, Ok., published in The Star yesterday morning said a delegation of Checotah citizens went to Eufaula on a special train Saturday but returned that night without the county records. They were unable to show authority to obtain possession of the records and the Eufaula citizens wouldn't give them up.

Storms Kill 21.

Omaha, Neb., June 6.—The tornado which passed over southern Nebraska and portions of northern Kansas Friday evening was the most destructive and covered the most territory of any similar storm which has visited the state in many years. At least 21 persons are known to be dead, five fatally injured and a score of others more or less seriously hurt some of them dangerously.

In addition reports received tonight state that several persons were killed at the towns of Byron, Neb., and Courtland, Kans., which towns have been cut off from communication with the outside world.

Pauls Valley Inundated.

Pauls Valley, Okla., June 6.—A heavy rain, which began at 10 o'clock last night and lasted until 12:30 and began again at 4:30 this morning has inundated everything throughout this section. Heavy rains are also reported at Wynnewood, Davis, Papp and on up to Purcell and McCumb. The rain here was the heaviest ever

NO THIRD TERM.

President Preparing to Leave United States for Hunt in Africa in 1909.

Washington, D. C., June 7.—An important significance in connection with Roosevelt's determination against a third term is contained in an admission made today for the first time that the president is making definite plans to leave the United States in April of next year for Africa, where he will spend a year hunting big game.

It was today stated positively that President Roosevelt with his son, Kermit, will sail from New York, for Cairo, in April, 1909.

BROWN CHOICE OF GEORGIANS.

Wins in Democratic Primaries by Plurality of 15,000.

Atlanta, Ga., June 7.—Returns up to midnight indicate the nomination of Joseph M. Brown as governor of Georgia, under the general democratic primary held here, by a plurality of about 15,000.

The Constitution estimates that Brown has won by from 15,000 to 25,000. The Brown managers claim the plurality is larger.

Governor Smith's campaign managers decline to make a statement and the governor himself says that he cannot comment on the result until tomorrow.

In all the eleven congressional districts indications are that the present democratic congressmen will be returned.

known.

Water from Rush Creek has backed up over a portion of Pauls Valley and the city is threatened. The south end of the Santa Fe yards are all under water, also the track south to Gulf Junction.

In the little canyon the water is seven feet over the track and still rising. All trac is washed badly and telegraph and telephone wires at many points are under water. The Washita river bridge is under water on both sides.

About 1350 feet of track is gone north of Wynnewood and part of the dump in the curve south sliding and carrying the track with it. The rain continued today at Wynnewood.

The steel bridge and 1300 feet of track at Wynnewood is washed away. The water at that point is three feet higher than during the recent flood.

A Little Scrubbing...

won't hurt him, in fact he will enjoy it if you use our baby talcum soap, as it is especially adapted to tender skin. It removes the dirt and leaves the skin as soft as velvet.

A little dash of Colgate's or Merck's Talcum Powder. Our stock of Toilet Articles, Perfumes, etc., is complete. Let us show you.
